

We would like to address the problem of recreational boat users letting sewage go either straight into the harbour or from holding tanks. My vision is: NO MORE BOATIES DUMPING SEWERGE INTO OUR HARBOUR.

What skills will we need?

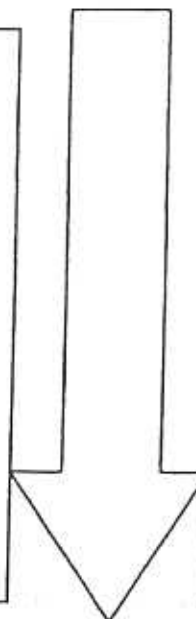

- Co-operation
- leadership

Who could influence the decision?

- N.R.C
- Community
- O.C.C

Who makes the final decision?

- Community and N.R.C

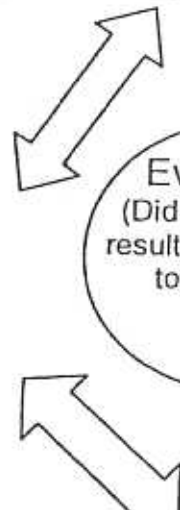

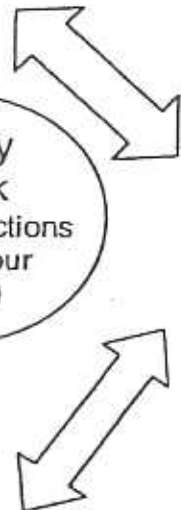

Reality Check  
(Do these actions lead to your vision?)

What are we going to do?

- Spread the news by telling them whats happening, what we want to happen, and how they can help, starting groups with people we already know ~~to~~ want to help.

Evaluation  
(Did your actions result in movement toward your vision?)

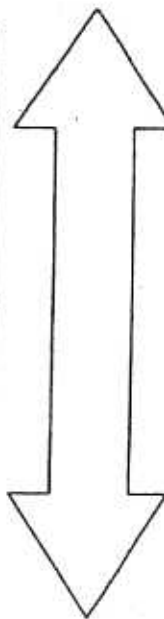

How will we find out what people think and feel?

- By educating them about what is happening ~~to~~ and the harm they are causing, then ask them and send out flyers and maybe things on the internet that will catch their attention.

How can we make people more aware of the issue?

- By telling them the harm they are causing.

Where will I/we find more information?

The internet?
