Executive Summary	i
1. Introduction	1
2. Background	1
2.1. Source description	3
2.1.1. Distant – Eastern source: South America (Chile/Peru)	3
2.1.2. Distant/Regional – Northern source: Solomon Sea/New Hebrides Trench	4
2.1.3. Regional/Local – Eastern source: Tonga-Kermadec Trench	5
2.1.4. Local – various	6
2.2. Model description	7
2.3. Model grid and bathymetry	7
3. Results	8
3.1. Distant - Eastern source: South America (Chile/Peru)	8
3.2. Regional/Local – Eastern source: Tonga-Kermadec Trench	11
3.3. Distant/Regional – Northern source: Solomon Sea/New Hebrides Trench	16
3.4. Local – Various	16
3.4.1. BOP faults and submarine landslides	16
3.4.2. Mystery sources	19
4. Regions	21
4.1. Northland Region	21
4.1.1. Distant – Eastern source: South America (Chile/Peru)	21
4.1.2. Regional/Local – Eastern source: Tonga-Kermadec Trench	21
4.1.3. Regional/Distant – Northern source: Solomon Sea/New Hebrides Trench	23
4.1.4. Local – Mystery source	23
4.2. Auckland region	25
4.2.1. Distant – Eastern source: South America (Chile)	26
4.2.2. Regional – Eastern source: Tonga-Kermadec Trench	27
4.2.3. Regional/Distant – Northern source: Solomon Sea/New Hebrides Trench	27
4.2.4. Local – Mystery source	27
4.3. Waikato Region	27
4.3.1. Distant – Eastern source: South America (Chile)	27
4.3.2. Regional – Eastern source: Tonga-Kermadec Trench	30
4.3.3. Regional/Distant – Northern source: Solomon Sea/New Hebrides Trench	31
4.3.4. Local – Mystery source	31
4.4. Bay of Plenty Region	33

4.4.1.	Distant – Eastern source: South America (Chile)	33
4.4.2.	Regional – Eastern source: Tonga-Kermadec Trench	34
4.4.3.	Regional/Distant – Northern source: Solomon Sea/New Hebrides Trench	34
4.4.4.	Local – various sources	36
5.	Conclusions	36
6.	References	37
