

What is our vision?

To stop/dramatically reduce, oil spills from the oil tankers coming into our ^(Wintarsley) harbour to the oil refinery - pollution; negatively affecting our marine life and coastal environment.

What skills will we need?

- ~~Act~~
- Be persuasive
- Persivere - persistence
- Debate - Debating
- Leadership and teamwork
- Communication skills
- Broadcasting skills - and media

Who could influence the decision?

- Teachers
- Students
- The Community
- Councils

Who makes the final decision?

- The Council
- For the law, the government will make the final decision.

What are we going to do?

- Tell people about the problem.
- We could pass a law so that ~~that~~ oil tankers must be double hulled and have drastic anti-pollution methods.
- Talk to the oil refinery and get information. they could also make sure that the oil tankers don't spill the oil in the Bream.

Reality Check
(Do these actions lead to your vision?)

contact the company.
Have an oil spill clean up team on call

Evaluation
(Did your actions result in movement toward your vision?)

the oil and shipping companies
An invention - pump that fills for oil
Get valid points supporting our vision and ambitions.

How will we find out what people think and feel?

- By doing surveys on the phone, internet, paper and by talking to people.
- We need to contact the company and the oil refinery.

How can we make people more aware of the issue?

- Through the media - magazines, newspapers, T.V, email.
- By talking to people and informing them about the issue.
- Signs, pamphlets.

Where will / we find more information?

From the company and the refinery. From books and the internet.
