

EcoCover[™] Mulch Mat

Cost Effective, Compostable

PRODUCT DESCRIPTION

EcoCover Mulch Mat is organic and compostable. EcoCover is produced from waste paper, organic glue and 80% recycled kraft paper.

KEY BENEFITS

EcoCover mulch is a 'world first' in providing a cost-effective substitute for plastic and other mulch systems used in the horticultural, agricultural and land management industries.

Unlike plastic, EcoCover allows the soil to breathe keeping micro organisms alive. Plus there is no heat/baking effect, but instead a beneficial protection against heat and cold. Being 100% compostable, EcoCover does not present the same environmental disposal problems as plastic.

By providing a better sub soil growing environment through higher moisture retention, worm populations are substantially improved. This promotes stronger plant and crop growth rates. The pH balance of the soil is also improved.

EcoCover slows evaporation in even the hottest conditions reducing the need for watering of new plantings. Evaporation is improved by up to 75%. Increased Moisture retention means less cracking in the soil. Vital air and water movement through the soil

MAXIMIZES WATER RETENTION, MINIMIZES WEED GROWTH, ACCELERATES PLANT GROWTH

EcoCover provides a biodegradable soil skin to improve soil conditioning and moisture retention, improve soil fertility, plant growth and security and suppresses weeds naturally.

EcoCover blocks the sunlight to render the weed seeds in the soil dormant thereby suppressing the ability for the seeds to germinate. The plant grows faster forming its own light blocking canopy naturally keeping the weeds suppressed.

REINFORCED FOR STRENGTH

Reinforced with natural jute for extra strength, EcoCover RF is ideal for managing siltation and erosion, step slopes, riparian sites, sites exposed to high winds and after excavation prior to vegetation.

IMPROVED PLANT GROWTH, EROSION CONTROL

- Builds soil carbon levels
- Organic
- Sequesters CO₂
- Compostable
- Conserves water
- Reduces plant mortality
- Controls weeds
- Promotes plant and crop growth
- Eliminates or reduces herbicide use and remedial maintenance
- A carrier of beneficial additives for the soil
- Saves money
- Ideal for landscaping projects *[for tough planting conditions we recommend EcoCover RF]*
- A thin layer of fine bark mulch can be placed onto EcoCover

TYPICAL TECHNICAL PROPERTIES

EcoCover™ Mulch Mat

EcoCover Roll Width	2m	2m	1m	1m
EcoCover Roll Length	20m	10	20m	10m
Pins required (per)	100	60	50	30
Available in RF	Yes	Yes	Yes	Yes
Bark Cover	Yes	Yes	Yes	Yes

APPLICATIONS

EcoCover Mulch Mat is recommended for use in the following applications:

- Domestic Landscaping
- Commercial Landscaping
- Forestry Projects
- Replaces plastic, jute
- Easily laid, pinned and placed around new and existing plants

LIFE

EcoCover's life span is greatly effected by the environment. In constantly wet areas, product life can be less than expected. Conversely for drier areas. Covering EcoCover with organic material can also reduce life expectancy. Ensure there is adequate control of birds, rodents, snails and slugs.
