

IVAN ANTHONY STANISICH, 40 KAIMAUMAU ROAD, RD 1, AWANUI 0486

To take water from a bore in the catchment of the Waiparera Stream on Section 18 Blk V Opoe SD at or about location co-ordinates 1618046E 6133608N for irrigation of horticultural crops on Section 18, Pt Sec 101, Pt Sec 41, Sec 50, Sec 55 B, Sec 47 Blk V Opoe SD.

Note: All location co-ordinates in this document refer to Geodetic Datum 2000, New Zealand Transverse Mercator Projection.

Subject to the following conditions:

- 1 The quantity taken from the bore shall not exceed:
 - (a) 720 cubic metres within any continuous 24 hour period; nor
 - (b) 3000 cubic metres within 7 continuous days; nor
 - (c) 120,000 cubic metres within the 12 month period 1 July to 30 June.
- 2 Notwithstanding Condition 1, the Consent Holder shall comply with any water-rationing plan (including possible cessation) required by the Council to cater for drought conditions.
- 3 The Consent Holder shall install, operate and maintain a water meter with an accuracy of $\pm 5\%$ to measure the quantities taken from the bore, as required by Condition 4. The meter shall be operated and maintained in accordance with the manufacturer's specifications. The Consent Holder shall, at all times, provide safe and easy access to the meter for the purposes of undertaking visual inspections of the meter and water take measurements.

Advice Note: The Resource Management (Measurement and Reporting of Water Takes) Regulations 2010 came into force on 10 November 2010. This has a number of requirements for water meters that may need to be met during the term of this consent. It is suggested that the Consent Holder familiarises him/herself with these prior to purchasing any new meter. Information on this regulation can be gained from either the Ministry for the Environment or the Council.

- 4 The Consent Holder shall keep a record of the quantities of water taken daily from the bore, including nil abstractions. A copy of these records for the previous 12 month period, being 1 July to 30 June, shall be forwarded to the Council's Monitoring Manager by 31 July each year, and also immediately on written request by the Council's Monitoring Manager. The records shall be in a format that has been agreed to by the Council's Monitoring Manager. In the event that no water is abstracted for the previous year, the Consent Holder is still required to notify the Council's Monitoring Manager in writing of the nil abstraction.
- 5 To prevent saline contamination, the Council's Monitoring Manager reserves the right to require the Consent Holder to cease the exercise of this consent at all times when the chloride level in water delivered by the bore is measured by standard methods to be greater than 200 grams per cubic metre.
- 6 Easy access for a water level probe shall be provided and maintained at the wellhead to enable the measurement of static water levels in the bore.
- 7 The reticulation system and components shall be maintained in good working order to avoid or minimise leakage and wastage.
- 8 There shall be no significant runoff from surface and subsurface drainage to natural watercourses, as a result of the exercise of this consent.
- 9 The Council may, in accordance with Section 128 of the Act, serve notice on the Consent Holder of its intention to review the conditions annually during the month of June for any one or more of the following purposes:
 - (a) To deal with any adverse effects on the environment that may arise from the exercise of the consent and which it is appropriate to deal with at a later stage; or
 - (b) To review the volumes of water and timing of abstraction in Condition 1 of this consent to ensure the efficient allocation of the resource.

The Consent Holder shall meet all reasonable costs of any such review.

Advice Note: The Council may, in accordance with Section 128 of the Resource Management Act 1991, serve notice on the Consent Holder of its intention to review the conditions any time for the following purposes:

- (i) *To provide for compliance with rules relating to water abstraction maximum or minimum levels or flows or rates of use of water in any regional plan that has been made operative since the commencement of the consent; or*
- (ii) *To provide for compliance with any relevant national environmental standards that have been made; or*

- (iii) *Where there are inaccuracies in the information made available with the application that materially influenced the decision on the application and where the effects of the exercise of consent are such that it is necessary to apply more appropriate conditions.*

EXPIRY DATE: 30 NOVEMBER 2025

This consent is granted this Thirteenth day of December 2010 under delegated authority from the Council by:

Allan Richards

Consents Programme Manager – Coastal & Works
