

## Rules for keeping stock out of waterways - summary

There are specific requirements that are not shown in the table – please refer to the relevant rules for details

	Wetlands >0.05ha	Wetlands that support a population of threatened species <sup>1</sup> <i>There are no maps.</i>	Lakes (all)	Lakes >1ha	Rivers and streams > 1m <i>Wider than one metre at any point within a property.</i>	Streams < 1m <i>The entire stream within a property is less than one metre wide. Only applies to streams that continually contain water</i>	Artificial watercourse >1m <i>A man-made channel, continually flowing with water. It does not include a channel constructed in or along the path of any historical or existing river, stream or natural wetland – refer Regional Plan for full definition</i>	Artificial watercourse <1m	Inanga spawning sites <i>The margins of rivers and estuaries that are inundated by spring high tides. There is no map of inanga spawning sites.</i>	1,000m upstream of a mapped priority drinking water abstraction point <i>Identified in the Regional Plan Maps click on 'Priority Drinking Water Abstraction Points'</i>	Outstanding freshwater body <i>Identified in the Regional Plan Maps click on 'Water Quality and Quantity Management Units' then 'Outstanding Freshwater Bodies'</i>	Coastal marine area <i>Beaches, mudflats, saltmarsh and other foreshore areas. This rule has been in place since 2009 (previously in the Regional Coastal Plan for Northland)</i>	Rivers upstream of swimming sites on Hātea and Raumanga rivers <i>Identified in the Regional Plan Maps click on 'Catchment Specific layers'</i>
