MfE guidelines 2003: Microbiological Water Quality Guidelines for Marine and Freshwater Recreational Areas. Published by Ministry for the Environment

Important note: Following a review of the recreational bathing water quality data in 2006/2007, several sites were removed from the programme

because they have had consistently good or poor water quality over the last four summers. These sites are no longer monitored. These sites are listed

on the Regional Council website at the following link:
