

Significant Ecological Estuarine Area Assessment Sheet for Wading and Aquatic Birds

Name/Area: Ngunguru Estuary

Summary:

The Ngunguru Estuary is a small estuary situated to the north-east of Whangarei Harbour. It has very small areas of tidal flat, but well buffered edges comprising mangroves, saltmarsh and adjacent shrubland and some exotic forestry. There is a little-modified sandspit at the entrance flanked by shrubland and forest linking south with Horahora Estuary, while a residential area (Ngunguru) lies on the northern side of the estuary. Low numbers of several threatened species frequent or visit the estuary mainly for feeding (refer Table below). The sandspit provides breeding habitat for northern NZ dotterel and variable oystercatcher and roosting flocks of several species. There are important populations of fernbirds, banded rails, crakes and Australasian bitterns in this area as well as recovering numbers of pateke (brown teal). The ecological significance of this estuary is High given the importance of the sandspit and the habitat sequences through to freshwater wetlands which collectively support many threatened and at risk species.

Table 'Threatened' and 'At Risk' shorebird species present at Ngunguru Estuary¹

<i>Species Scientific Name</i>	<i>Species Common Name</i>	<i>NZ threat classification</i>		<i>Significance for species</i>
<i>Botaurus poiciloptilus</i>	Australasian bittern	Threatened	Nationally endangered	Locally important breeding and feeding
<i>Phalacrocorax varius</i>	Pied shag	Threatened	Nationally vulnerable	Locally important breeding and feeding
<i>Egretta sacra sacra</i>	Reef heron	Threatened	Nationally vulnerable	Local use for feeding
<i>Charadrius obscurus aquilonius</i>	Northern NZ dotterel	Threatened	Nationally vulnerable	Locally important breeding and feeding
<i>Larus novaehollandiae scopulinus</i>	Red-billed gull	Threatened	Nationally vulnerable	Local feeding
<i>Hydroprogne caspia</i>	Caspian tern	Threatened	Nationally vulnerable	Local feeding
<i>Haematopus finschi</i>	NZ pied oystercatcher	At Risk	Declining	Local feeding
<i>Himantopus himantopus leucocephalus</i>	Pied stilt	At Risk	Declining	Local feeding
<i>Sterna striata</i>	White-fronted tern	At Risk	Declining	Local feeding
<i>Bowdleria punctata</i>	Fernbird	At Risk	Declining	Locally important breeding and feeding
<i>Gallirallus philippensis</i>	Banded rail	At Risk	Declining	Locally important breeding and feeding

<i>Anas chlorotis</i> (North Island)	Brown teal	At Risk	Recovering	Locally important breeding and feeding
<i>Haematopus unicolor</i>	Variable oystercatcher	At Risk	Recovering	Locally important breeding and feeding
<i>Porzana tabuensis tabuensis</i>	Spotless crake	At Risk	Relict	Locally important breeding and feeding
<i>Phalacrocorax carbo novaehollandiae</i>	Black shag	At Risk	Naturally uncommon	Local feeding
<i>Phalacrocorax melanoleucos brevirostris</i>	Little shag	At Risk	Naturally uncommon	Local breeding and feeding
<i>Phalacrocorax sulcirostris</i>	Little black shag	At Risk	Naturally uncommon	Local feeding
