RE: NORTHLAND REGIONAL COUNCIL – AWANUI FLOOD SCHEME UPGRADE – ADDENDUM TO APPLICATION

Please take this letter as an addendum to the application recently lodged for approval with both the Northland Regional Council and Far North District Council (referenced APP.042075.01.01 (NRC) and 2300056-RMALUC (FNDC)).

The proposal is amended as follows:

- Additional flood protection works are proposed to be undertaken as shown on the amended scheme design plan attached, and in Figure 1 below:

Figure 1: Proposed new works:

The purpose of these works is to provide additional protection for Northpark development to the north (and surrounding residential and commercial activities). The above works will take place within the following allotments:

Legal description	Landowners	Type of works proposed
Lot 1 DP 45150	B and P Waitai	Floodwall
Lot 2 DP 45150	A and M Dunn	Floodwall
Lot 3 DP 45150	H Bolmanac and K Subritzky	Floodwall
Pt OLC 214	B Hodgson	Floodwall
Lot 4 DP 149369	FNDC (local purpose reserve)	Floodwall
Lot 1 DP 123713	Bells Produce Ltd	Stopbank
Lot 3 DP 140707	FNDC (local purpose reserve)	Stopbank

The adverse effects associated with these additional works will be addressed throughout the notification process. Geoff Heaps has confirmed in his email dated 27th of August 2020 that the properties where additional flood protection works are to be undertaken have been included in the limited notification list.

- This application also seeks 'blanket' resource consent approval to undertake rock protection works to stabilize slips and unstable slopes along the river. The rock spalls will be placed at the toe of the stopbank (one rock diameter below rest water level) and building a base large enough to overcome the velocity and slip forces of the stopbank.

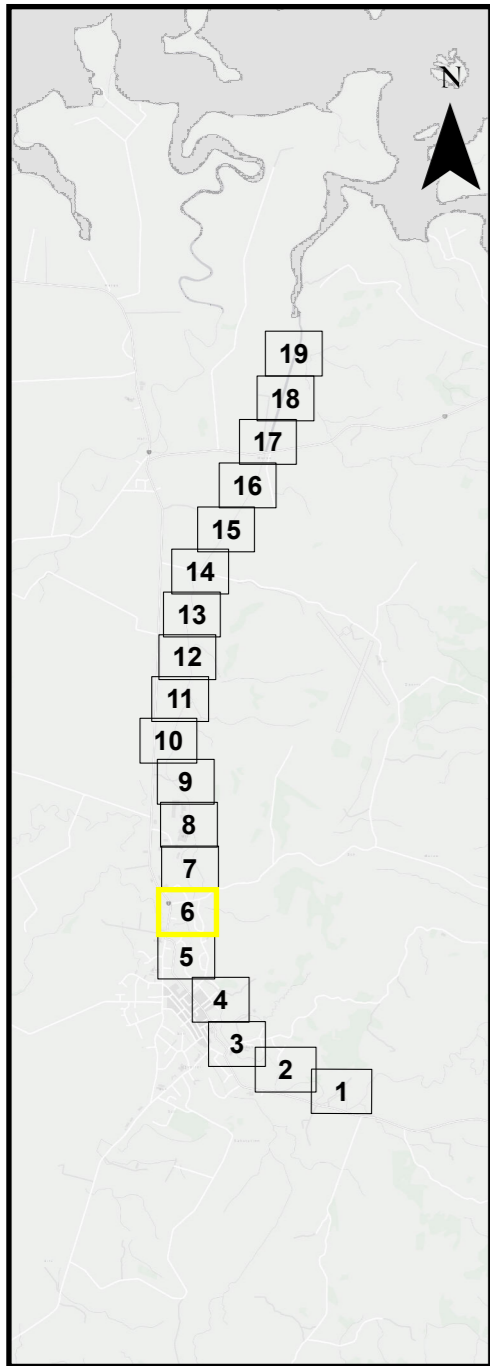

These works will assist with avoiding negative effects associated with ongoing erosion and slip hazards. Provided compliance with erosion and sediment control measures to be put forward following approval of the resource consent, the potential effects will be avoided and (in-fact) will be largely positive.

If there are any questions regarding the additional works proposed, please advise.

Yours faithfully
