

Protect our waterways!

FREE hands-on sessions

In-school / on camp / at EOTC days

Northland Regional Council is offering biosecurity education for schools.

These sessions help students understand how to stop the spread of the invasive freshwater clam (Corbicula) and other freshwater pests.

We can facilitate:

- Interactive Check, Clean, Dry learning
- Identification of freshwater pests
- Tips for protecting rivers, lakes and wetlands
- Demos on cleaning watercraft and gear to stop pest spread
- Resources to support class programmes

When and where

During school visits, outdoor lessons, activity days, or events.

We will come to your school or your activity location.

Register now!

To book in a session or to find out more info contact our CCD Ambassadors
