MfE guidelines 2003: Microbiological Water Quality Guidelines for Marine and Freshwater Recreational Areas. Published by Ministry for the Environment

Important note: Following a review of the recreational bathing water quality data in 2006/2007, several sites were removed from the programme either because they have had consistently good or poor water quality over the last four summers. These sites were not sampled in 2008/09. These sites are listed on the Regional Council website at the following link: <http://www.nrc.govt.nz/Living-in-Northland/At-the-beach/Swimming-water-quality/Sites-removed/>
