

Marine Pests Teachers' Workshop

Imagine if we could go back in time and stop pests like rats, stoats or weeds like gorse from ever coming into Aotearoa New Zealand. When it comes to our coastlines, we still have a chance to do that!

- Get hands on and experience pests impacting our marine environment
- Dive into activities linked to the curriculum, Enviroschools and climate change
- Learn how to monitor for marine pests from local scientists
- Play the new Marine Invaders card game
- Develop real life science capabilities

When and where

Thursday 21 March 2024

9am - 3pm

206 Onerahi Yacht Club
Beach Road, Onerahi,
Whangārei

- No charge
- Morning tea and lunch provided
