Introduction

As part of council's consultation on the Long Term Plan 2021-2031 and draft User Fees and Charges 2021/22, a series of 'Have Your Say' events were held around the region. These were held in lieu of a more formal hearing process.

Each event was attended by up to four councillors and several staff who recorded all feedback that was provided by the community to councillors during conversations. This enabled people to provide face-to-face feedback to councillors about the long term plan proposals, to better understand the proposals, and to gain advice from expert staff.

The recorded information is set out in this document, allowing full council to consider community views when deliberating LTP proposals.

Seven 'Have your say' events were held around the region during March:

Location	Date	Number of attendees recorded
Whangārei (later afternoon)	Tuesday 23 March	3
Whangārei (morning)	Wednesday 24 March	6
Kerikeri (midday)	Thursday 25 March	11
Otiria (late afternoon)	Thursday 25 March	28
Waipū (midday)	Friday 26 March	29
Dargaville (late afternoon)	Friday 26 March	2
Kaitia (midday)	Saturday 27 March	8

In November 2020 letters and emails were circulated to list including previous submitters and interested parties, to give plenty of notice about the event format and that the events would be held in lieu of hearings.

In mid-March, at the beginning of the formal consultation period, we advised of and promoted the events through:

- Public notice
- Media release
- A comprehensive social media campaign including geotargeted advertising
- Radio advertising
- An 'Our Northland' council news special. This was a double-page spread in five papers across Northland – the Northland Age, Northern News, Bay Chronicle, Whangarei Leader and Kaipara Lifestyler)
- Mailout (a mix of hard copy by email) to the roughly 5800 subscribers to our online council news, mooring holders, previous submitters and interested parties.
- Encouraging staff to spread the word when liaising with the community.

This report provides a full account of all feedback recorded at the events.

About the following feedback

The following is what was recorded at the events – we've essentially just transcribed the handwritten notes to keep it true to form. To make it easier to navigate through, we've grouped the feedback into themes.

01. Natural environment

Addressing water health

Location	Comment
Whangārei	<ul style="list-style-type: none"> Main issue water and air quality, majority of dollars too. Pesticides effect on environment (water and air quality) – would be good to highlight more. Community groups given more tools to help with water and air quality - pesticide tests/monitoring. More emphasis on community being made aware of regulation. Need to move faster, agencies passing the buck on certain environmental issues. Immediate moratorium on aerial and roadside spraying Water quality high importance, petrol's from overseas regarding pollution of water Hikurangi swamp Mangakahia waterways very important to locals, water quality/access, transfer to tuna manually up past power station. Waka used to help this/clean up waterways. Health of waterways and climate change
Whangārei	<ul style="list-style-type: none"> Water work - very important The Whangārei harbour should be given value like a person, and decisions around this should be considered in terms of how good the decision is for the water/harbour (Te mana o te wai)
Kerikeri	<ul style="list-style-type: none"> Disappointed with rivers status. High levels of E.coli after heavy rain. "No swimming" signs for rivers that ARE swimmable. Would like to undertake further tests to detect bovine, avian, human factors (test cost approx. \$800) A lot of concentration is on waterways, but are we considering spray in terms of water quality. Support for this monitoring
Otiria	<ul style="list-style-type: none"> No specific comments recorded
Waipū	<ul style="list-style-type: none"> Water flow/alga e/blockages/flooding/dredging (Waipū) Waipū - We want a "living" estuary not a dead pungent wasteland devoid of life, that is our responsibility Environmentally based fish traps, collection, matauranga - no continuity in funding meaning no continuity in data re matauranga Council disturbing monitoring sites of mana whenua (lack of comms - OPI - economies of scale Better planning and coordination of monitoring events. Not constrained by council protocol etc. E.g. council staff stopping when Māori still going Estuary and Waipū stream - want to know what's planned [to address algae issue]. Seeking information. Issue is that algae gets trapped due to siltation and lack of water flow. So silted that you can now walk across estuary. The 'naturally' occurring bloom is getting trapped. People are getting frustrated. It's an unsafe situation (noted that the health board has tested). Terrible smell. People are still fishing in the estuary, no signs up. Questions on what the algae is thriving on, what's feeding it. The bloom has never been this intense before, seems to be getting worse How long will it take to get science/modelling so we can understand what's happening [Waipū estuary]. Is it subdivisions? Silt? More rain? Cut a channel in the [Waipū] estuary! People end up doing it themselves. Waipū stream is foul - don't know why. Increase water flow in Waipū estuary - sick of picking up dead fish/shellfish. Other end of estuary also foul

	<ul style="list-style-type: none"> • Could we stop crab hunting? • Nutrients = pollution (in relation to algae) • What are the parameters for doing something about water quality after you've monitored? • Broad support for natural environment proposals
Dargaville	<ul style="list-style-type: none"> • No specific comments recorded
Kaitaia	<ul style="list-style-type: none"> • No specific comments recorded

Managing our water catchments

Location	Comment
Whangārei	<ul style="list-style-type: none"> • No specific comments recorded
Whangārei	<ul style="list-style-type: none"> • Do not support fencing of creeks
Kerikeri	<ul style="list-style-type: none"> • No specific comments recorded
Otiria	<ul style="list-style-type: none"> • No specific comments recorded
Waipū	<ul style="list-style-type: none"> • Wetlands - protections on wetlands to avoid further degradation. Regulation of wetlands? • General support for catchment management and downstream benefits • Question around cost of fencing waterways - cost, dates, distance, wetland fencing • Roll out of Farm Env Plans - better understanding of changes [needed]. Cultural safety and understanding of staff • Catchments and water management - water flow is variable in stream [Waipū]. Would like consistent flow and for water to be able to be used • Water catchments - roadside drains should be going in to wetlands to stop silt and rubbish. Australian example • Broad support for natural environment proposals
Dargaville	<ul style="list-style-type: none"> • [Fed Farmers] Kaipara Moana: Making sure the programme is well run is important. Making sure trees maintained. Big concern is bottom 20% who don't respond well to being regulated, no complying. Top 20% is good. • [Fed Farmers] Catchment approach is important going forward. Seems to work well
Kaitaia	<ul style="list-style-type: none"> • We want to plant along our waterways • Access to eco sourced plants • Nurseries will led to - community/economic/social/enviro wellbeing

Biodiversity

Location	Comment
Whangārei	<ul style="list-style-type: none"> • No specific comments recorded
Whangārei	<ul style="list-style-type: none"> • No specific comments recorded
Kerikeri	<ul style="list-style-type: none"> • No specific comments recorded
Otiria	<ul style="list-style-type: none"> • No specific comments recorded
Waipū	<ul style="list-style-type: none"> • Mangawhai important breeding area - restoration society has worked hard to protect within fast-growing, highly-used harbour • Broad support for natural environment proposals
Dargaville	<ul style="list-style-type: none"> • [Fed Farmers] Possible lack of coordination between district councils and regional - biodiversity policy, wetland mapping etc. Need for more nuance in policy for wetland fencing

Kaitia	<ul style="list-style-type: none"> No specific comments recorded
--------	---

Biosecurity – land

Location	Comment
Whangārei	<ul style="list-style-type: none"> Suburban cat and dog issues with Kiwi. Pine forests not allowed within certain radius (impacts on environment, rivers, air, effects of logging - notifiable activity) Why can't we help more people with pest plans (more community engagement)
Whangārei	<ul style="list-style-type: none"> Don't try to tackle everything. This could be very costly. Hold back on embracing every issue. Don't want rates to skyrocket. Need to be reasoned and apply logic to biosecurity spend. Utilise landowners more for biosecurity work. E.g. encourage rabbit control, provide more possum traps (CPCAs). Need to be made aware of CPCAs etc, and other work
Kerikeri	<ul style="list-style-type: none"> Support the rate increase for pest control Biosecurity - land - preferred option is to 'do more'. Good policy!
Otiria	<ul style="list-style-type: none"> No specific comments recorded
Waipū	<ul style="list-style-type: none"> Broad support for natural environment proposals
Dargaville	<ul style="list-style-type: none"> No specific comments recorded
Kaitia	<ul style="list-style-type: none"> No specific comments recorded

Biosecurity – marine

Location	Comment
Whangārei	<ul style="list-style-type: none"> No specific comments recorded
Whangārei	<ul style="list-style-type: none"> Marine pests - occasional rentals of moorings with hull fouling - need to tighten rules about who you can rent to Users should pay for marine biosecurity
Kerikeri	<ul style="list-style-type: none"> Spend on marine pest control seems wasted resource. Fanworm is here - what can actually be done about it?
Otiria	<ul style="list-style-type: none"> No specific comments recorded
Waipū	<ul style="list-style-type: none"> Marine biosecurity - need to do more. Fanworm horse bolted - council needs to encourage people to do more at early stages to avoid same thing with other pests, needs to be in places for new incursions - monitoring and action plan when found Pacific oysters - a pest, something needs to be done. Give them status as a pest. Restoration society happy to be actively involved in removal Pest control - do things better, be more efficient, high output Biosecurity - major issue with guava moth. Need info on how to manage this (landcare group explained) Shipping is a big problem in terms of biosecurity - their movements. Moving between hen island and mainland Have to do marine biosecurity work - support this proposal Broad support for natural environment proposals
Dargaville	<ul style="list-style-type: none"> No specific comments recorded
Kaitia	<ul style="list-style-type: none"> No specific comments recorded

02. Community resilience

Flood protection

Location	Comment
Whangārei	<ul style="list-style-type: none"> Flood wall Tarewa - great. (blue/green WDC)
Whangārei	<ul style="list-style-type: none"> Note historical reluctance to address flood/drought issues. Support for flood works Support/agree that flood work needs to be done - all four areas are important. Ratepayers shouldn't have to bear the full cost of flood scheme. Remove material from rivers as solution to flooding Building new dams should introduce opportunity to sell water to horticulture. Dams can silt up. Don't build them in clay areas
Kerikeri	<ul style="list-style-type: none"> In a known flood area, do they pay increased rates - differentiated rates for flood risk zones
Otiria	<ul style="list-style-type: none"> The flooding is council caused - roads, rail, cycle path, footpath, closing off swamps. Blocking natural flood plain, problem starts far upstream. What's happening to the money that was there from previous rates? Why should we pay for council caused problems? This is not the way Māori talk - we stand up and talk loud not sit down and talk quietly If it works, what if it doesn't? Those downstream of the spillway don't want to pay to have water diverted towards them Remove the silt where it used to be really deep after the waterfall You used to be able to get a boat all the way up to Taumārere at low tide The silt is coming from upstream - fix this upstream. Silt is not the cause it's a symptom The spillway put in has caused more problems than it has good Floods don't just start in Kokopu, it starts further back Do our voices really get heard? Listen to the people who know the land I am happy to pay, and I am happy with the work proposed - flooding has always been here It might work and it might not but let's try. The council are here to help. Get behind the council and make it happen Let's get it done and if it doesn't work then go back to council If it comes onto my land then NO as they can't guarantee my ancestors safety (burial caves) We have a flooding issues - you don't raise the height of the bridge, you clean out the drain. Clean out the river first Why can't we clean out the river and use the silt to create stopbanks The community needs to get together and make some decisions We need to keep working to not lose the funding and to work with those stuck in the floods Why can't we clear small areas of swamp to clear flooding - council has said no. Needs to be cleared to let the flood water through We need to do something to use the govt money, so we don't lose it Are there other options we can look to do - diverting water at other points?

	<ul style="list-style-type: none"> • Happy to pay the extra rate if it's going to help, particularly the town and the people trapped in the flood • Dredging of the Veronica channel? • Treat the cause not the symptom • Why can't we use culverts? • Who owns the roading SH1 get them to pay also. Road isn't ours. Bridge isn't ours • If I agree to the increase can I have sewerage deducted/stopped • Request to repair and clean drains • Concerns raised with possible flood effects from projects NRC is proposing • Expressed interest in causes of these floods • Complaints about the new spillway causing floods • Good feedback from some on the \$86 • Interest from some to go for the proposed option • Need better comms from Taumārere flood committee - articles, letters to residents etc • Supporting NRC's proposed scheme. Wish to stop flooding. A small number of businesses will benefit, but still keen to get it started • Concerns that some people have not understood the option/plan or map pictures and this is why they are being so reluctant to the proposed option • Back in the day Borough council used to undertake cleanage of Taumārere (?) (significant natural areas need cleaning) • Good feedback on implementing spillway plan • Cycle way - issues from drainage/floodpaths • Taking water for Kho? Rivers are silting up • Moerewa/Kho/Kawakawa paying more rates than Kerikeri? E.g. road railway. How does it contribute to flooding • How do we address siltation and drainage issues - connections to flooding? • Percentage of local hapū to support decisions/ for solutions • Rates? Own land in Kwa/Moerewa, pay rates twice and how long do I have to pay for it? • Flood mitigation plan? How long does it last? • What does NRC do for Taumatakuku? Do not agree to paying rates • First time have taken on board; what Murray Armstrong said; whole spillway to protect marae. So tautoko • Rates are differentiated • Housing being deeply impacted by flooding and for some really bad • What are the river flows and how will the flood works mitigate improve/remedy impacts on Kokopu? Behind kuia homes? • Impact of erosion and loss of land • Whānau at Taumatakuku, because of flood plan not working? • What about fixing of drains/improvements needed • Last LTP plan we did not agree and \$\$ were redeployed to another project/area • Are wāhī tapu well identified in the plan? • Issues re: silt into water impacts/ symptom of the problem • Problems being addressed in Opalū/Motatau • What do the council do for my whānau in Motatau? • Listen to the people who know better/ local knowledge
--	---

	<ul style="list-style-type: none"> • Endorse and happy to pay rates increase; seen the flooding and I'm happy to pay that • Council here to help us/ if it does work then tautoko; if it doesn't then keep them/ council accountable • Get behind council to get it done • Concern? \$5m; what happens with the \$\$ • North Otiria Road - should work to keep them safe. Direct the flood to Harakeke then culvert at Otiria Marae, under road to waterfalls • Other issue - culvert needs to be opened up, go back into main river. The water currently goes down Jim Shortlands by walkway. Run back in to Harakeke, bottom of that river needs a clean out. Turntable hill can take more via culvert • Snowden Ave side of bridge needs to be cleaned out • Is turntable bridge sinking? Used to have floodgates. Used to be cleared regularly by PEP (dole people). Should look in to this again. Happy with the work going on down Mason Ave • Look after the live ones, don't worry about the cemetery. Must use the money, do it, use it • Otiria has big issues including sewerage • Massey Street, Plunket Street, Pembroke - all the streets that get flooded. All houses under water. Just a water problem, need to diver the street water. Most streets flood anyway • Waitangi claims - what's going to happen the land subject to claims?
Waipū	<ul style="list-style-type: none"> • Broad support for community resilience proposals
Dargaville	<ul style="list-style-type: none"> • [Fed Farmers] Who pays for flood work? Locals should be paying more. • [Fed Farmers] Ruawai stopbanks - need to improve. What's the plan? Low-risk to life, high importance to economy of Northland; locals can't afford alone
Kaitia	<ul style="list-style-type: none"> • No specific comments recorded

Upgrade our tsunami warning system

Location	Comment
Whangārei	<ul style="list-style-type: none"> • No specific comments recorded
Whangārei	<ul style="list-style-type: none"> • Tsunami warnings not well communicated and caused big traffic congestion. Unclear what tsunami alarm improvements are - if current isn't working then should replace. Phone warnings weren't consistent. Messaging wasn't consistent. Acknowledge that tsunami warning wasn't local issue - a national centre issue. Concern around number of houses in tsunami zones - why are they being built there? Tsunami risk areas should be identified and publicised. How high are the different suburbs etc
Kerikeri	<ul style="list-style-type: none"> • Tsunami warning - need to have clear guidance on the level of risk on a geographical scale - should be easier to find out where you are/where you sit. Information can be confusing. Availability of zoning maps - link etc. Or a rule of thumb around height above sea level. Messaging should include direction, e.g. 'get above 10m'
Otiria	<ul style="list-style-type: none"> • No specific comments recorded
Waipū	<ul style="list-style-type: none"> • Tsunami maps good for zones; not good at telling you where to go, evacuation points (Papamoa good example of doing it well.) • Tsunami alarms - yes to upgrade

	<ul style="list-style-type: none"> • People not hearing Mangawhai siren • Civil defence - identification of no-go zones. E.g. below dams for gathering sites. Comms of sites of safety • Support for tsunami siren upgrade. Current sirens easily confused with other alarms • Tsunami sirens should be multi-lingual • Broad support for community resilience proposals
Dargaville	<ul style="list-style-type: none"> • No specific comments recorded
Kaitia	<ul style="list-style-type: none"> • Tsunami warning system - too reliant on power. Support for communities for receiving timely comms in emergencies • Education needed - people to know where locations of safe evacuation site, care of elderly in emergencies

New emergency coordination centre

Location	Comment
Whangārei	<ul style="list-style-type: none"> • No specific comments recorded
Whangārei	<ul style="list-style-type: none"> • CDEM building - support but ideally would use existing buildings • Support for CDEM building - once it is clear what it is, totally support • Concern about unused buildings, so no support for building new facilities - use existing
Kerikeri	<ul style="list-style-type: none"> • No specific comments recorded
Otiria	<ul style="list-style-type: none"> • Issues raised regarding CDEM. 30k wasn't enough. Not satisfied with CD's performance during last floods
Waipū	<ul style="list-style-type: none"> • CDEM centre shouldn't spend as much if just a technical centre • Broad support for community resilience proposals
Dargaville	<ul style="list-style-type: none"> • [Fed Farmers] CDEM centre - Too close to town? Could it be out of Whangārei a bit? Kauri? Concept of centre okay, comms resilience with limited phone towers, overlooking
Kaitia	<ul style="list-style-type: none"> • No specific comments recorded

Climate change resilience

Location	Comment
Whangārei	<ul style="list-style-type: none"> • Real issues with climate change which is where money should be going. • Always do more! Emission controls on cars, tree protection. Pine forest/logging not in certain areas. Blanket spraying (pesticides)
Whangārei	<ul style="list-style-type: none"> • Reclaiming land not a good idea with sea level rise. Climate change is not real • Acknowledge that electric vehicles will become with norm. Issues with grid supply when everyone is charging in the evening. North would be vulnerable to a severance from the Auckland grid. Concern over practicalities and ongoing impacts of electric cars and vulnerability of power supply. Will eventually have to pay for all charging stations • Smoke from fires makes rain/breaks drought. Fire should be by permit rather than blanket ban
Kerikeri	<ul style="list-style-type: none"> • Supportive of zero carbon activities - carbon neutral NZ trust Kerikeri has approx. 300 members. Good interactions with NRC staff on this issue. Happy with draft Carbon plan

Otiria	<ul style="list-style-type: none"> No specific comments recorded
Waipū	<ul style="list-style-type: none"> Climate change - need guidance from NRC Keen to collaborate with council on climate change. NZ refining sees itself as a key player in transition. E.g. why is biofuel target out at 2025? We can do better within current infrastructure. This dovetails in to NRC policy development on climate change Consenting environment for renewable energy infrastructure; tensions (NZ refining) Local solutions for national problem. Tension between local solutions and setting precedent - becomes a barrier Wind farm proposals, renewable energy development more difficult in current regulatory environment No more seawalls More seawalls Pull Ets to include wetlands and pasture Totally support adaptive pathways planning Support climate change conversation Support council use of electric cars- this is great Broad support for community resilience proposals
Dargaville	<ul style="list-style-type: none"> [Fed Farmers] Keen to bring forward adaptation planning for Ruawai
Kaitia	<ul style="list-style-type: none"> No specific comments recorded

Improving water resilience

Location	Comment
Whangārei	<ul style="list-style-type: none"> Water needs apply to large portion of the community. Not enough remain, job loss due to COVID-19 - affordability of solutions. Tank scheme sounds like a good idea, support this. Water saving education (water foot pump for kitchen dishes), initiative saving solutions
Whangārei	<ul style="list-style-type: none"> No specific comments recorded
Kerikeri	<ul style="list-style-type: none"> No specific comments recorded
Otiria	<ul style="list-style-type: none"> No specific comments recorded
Waipū	<ul style="list-style-type: none"> Water tank scheme - only query around bang for buck – i.e. vs investment in infrastructure Yes to water tank scheme Improving water resilience isn't the landlords responsibility, broadly good. Support water tank scheme - everyone should have water - should also offer to urban Broad support for community resilience proposals
Dargaville	<ul style="list-style-type: none"> [Fed Farmers] Hope NRC is encouraging water storage. Water resilience scheme. Not sure if it sits well. How do you prioritise? Alternative drinking water supply to take pressure off is a good idea. Small communal system rather than single house? Is it council's responsibility?
Kaitia	<ul style="list-style-type: none"> Water supply/resilience (be good to see changes articulated in the plan): remote areas (Te kao), lacking resilience, res. to supply area - work with iwi/not just for council, issue is rating/metre (affordability), current quality of drinking water - Te Kao, taking of water is an issue, issues with water take Te Ahu (discharges upstream), water should be piped from source , not taken from downstream

	<ul style="list-style-type: none"> • Difference between responsibility for base infrastructure verses support for need for more water supply during drought • Privatisation of water • Heard all this before: activities having impact on environment, mitigation methods limited, common sense needs to prevail, need for some open/honest action (whole of community) • Population growth/household water collection • Sediment build up – Hokianga • Not all houses are collecting water (rural) - Whatawhiwhi example • Private water collection (bylaw) • Be a part of proposals (journey together) from inception - think tank. Māori rep good start • Business runoff - what is being monitored, is it reliable data? • Stormwater flow/ invasive organisms/ discharging/ water takes/ biosecurity - hugely important - priority over water supply for drinking • Stormwater flow compounding on availability of drinking water • Process for allocating water should follow common sense
--	--

Harbour safety and navigation

Location	Comment
Whangārei	<ul style="list-style-type: none"> • Marine environment with water use from sporting agencies, access to the water (fair access). Mooring of boats hindering access to water, restricting water-based recreation, too many, greatly increasing in amount - a concern
Whangārei	<ul style="list-style-type: none"> • Whangārei harbour - do not support tankers/cargo containers at the port. Do not want to look at this
Kerikeri	<ul style="list-style-type: none"> • No specific comments recorded
Otiria	<ul style="list-style-type: none"> • No specific comments recorded
Waipū	<ul style="list-style-type: none"> • Concern that port and starboard lights are not visible (Mangawhai). Channel used to move, now more permanent. Entry markers need to be improved, need to delineate channel. Reef opposite Sellars Reserve needs to be marked • NR harbour wardens - very little power to do anything (e.g. jet skis), don't have boats. Health and Safety issue. Need wardens with better powers and mobility • Harbour beacons should be run by solar • Broad support for community resilience proposals
Dargaville	<ul style="list-style-type: none"> • No specific comments recorded
Kaitia	<ul style="list-style-type: none"> • Cost of abandoned boats - should be a part of the targeted fees (to remove bond cover, salvage/sale), should be more penalties, become nesting grounds • Harbour safety - Canadian geese detrimental to harbours

Increasing CityLink services

Location	Comment
Whangārei	<ul style="list-style-type: none"> • Shuttle service from rural areas (Tutukaka), potentially local contractor, three times a day • Smaller bus sizes rather than the big empty buses currently. Electric buses

Whangārei	<ul style="list-style-type: none"> • Concern about underutilisation of buses. Need to look at local travel share system/shuttle. Subsidise these programmes rather than traditional bus services. People should pay something but need to look in to alternatives. No buses in some areas (past Maunu). No incentive to use buses, cars very prevalent. Keep moving with technology • Why are buses so big when patronage is low. Like to see 'park and ride' beginning - Maunu, Parua bay etc • "Pushy" bus drivers could be another option/ alternative to bus lanes, e.g. Tiki hill. Need to work on comms/marketing around bus usage. Change attitudes
Kerikeri	<ul style="list-style-type: none"> • Electric buses - could these start operating earlier? Support
Otiria	<ul style="list-style-type: none"> • No specific comments recorded
Waipū	<ul style="list-style-type: none"> • Electric buses - have we considered biofuels? NZ refining a big producer of hydrogen. Cost of transitioning with diesel fleet using biofuels - cheaper? • City link - what about Waipū buses? Didn't even know there was a bus service to Waipū. Some people can't drive. Devonport has a small electric van that will take you where you want to go. App based. Could something like this work? • Transport connections with Auckland - we are vulnerable to being cut off • Broad support for community resilience proposals
Dargaville	<ul style="list-style-type: none"> • [Fed Farmers] Lots of issues coming farmers way - water, flow-on effects of supply chain issues, increasing costs, and unavailability of parts. Demographics of Dargaville changing - no transport options
Kaitia	<ul style="list-style-type: none"> • No specific comments recorded

03. Regional leadership

Māori partnerships

Location	Comment
Whangārei	<ul style="list-style-type: none"> Māori engagement important Councillor Māori engagement - get info out more, use of technology to dispense info more readily. School road shows, children engagement. Enviro schools limited resource and seems like a competition to get into. School initiated - school be council initiated more
Whangārei	<ul style="list-style-type: none"> Concern re rep review/Māori seats and skewing that can happen by using Māori electoral role. What is people want to be on Māori role for national elections but not for local? The idea of staff having cultural capacity/being able to communicate with Māori and coming alongside is good. Support this
Kerikeri	<ul style="list-style-type: none"> No specific comments recorded
Otiria	<ul style="list-style-type: none"> Support Māori wards Does it/LTP account for Treaty claims?
Waipū	<ul style="list-style-type: none"> 2001 restoration plan (Mangawhai Harbour) - want to review with NRC and iwi, iwi want more co-management Support for Māori partnerships work; vital for NZ refining too. (NZ refining) Open to co-management of Mangawhai harbour, needs to build on work that has come before (restoration society) Big yes to Māori partnerships and increasing work Support for and against referendum for Māori seats Support Māori ward decision Māori must have their voice heard. Support this Broad support for regional leadership proposals
Dargaville	<ul style="list-style-type: none"> [Fed Farmers] Seems like big extra cost. Need to make sure that democratic process is not undermined. Worry about what 'partnerships' means
Kaitia	<ul style="list-style-type: none"> Māori rep - racist, vote should be based on best suited to the role

Supporting the work across council

Location	Comment
Whangārei	<ul style="list-style-type: none"> School road shows, children engagement. Enviro schools limited resource and seems like a competition to get into. School initiated - school be council initiated more. Community given more info to help improve their involvement. Become more of a we than a you or and I (us/you). More in kohanga and kura schools
Whangārei	<ul style="list-style-type: none"> Data collection can be a bottomless pit - sometimes smaller solutions can be better options
Kerikeri	<ul style="list-style-type: none"> No specific comments recorded
Otiria	<ul style="list-style-type: none"> No specific comments recorded
Waipū	<ul style="list-style-type: none"> Historic issues with NRC relationship - want to build better collaboration (Mangawhai Harbour Restoration Society) Support regional leadership

	<ul style="list-style-type: none"> • Education on climate change, water poverty, harvesting, origins. Should this be a function of council? • Broad support for regional leadership proposals
Dargaville	<ul style="list-style-type: none"> • No specific comments recorded
Kaitia	<ul style="list-style-type: none"> • Live meetings including working parties, more and more important given the centralisation of services/meetings to Whangārei • Public meetings with staff via online

04. Other decisions

Oruku Landing

Location	Comment
Whangārei	<ul style="list-style-type: none"> Oruku not right time for that sort of item for spend. COVID-19 is unknown and thus possible restricted use of conference facilities
Whangārei	<ul style="list-style-type: none"> Do not support Oruku investment. Is the development wise given tsunami zones? Stadium should meet some of the conference centre needs. Firm no on Oruku (x3) - could turn people away by having accommodation that is too expensive. Need cost-friendly option. Support for Oruku
Kerikeri	<ul style="list-style-type: none"> Disagree with Oruku landing option. Prefer to see donations from WDC for Oruku and more contribution from DCs. How relative is this project to today's COVID-19 world Concern that ratepayers across the regional will have to cover it. How can you start building without talking to ratepayers?
Otiria	<ul style="list-style-type: none"> No specific comments recorded
Waipū	<ul style="list-style-type: none"> Competition with stadium? Timing in wake of COVID-19? Better assessment of benefits and risks? Cautious support IF it stacks up Should Far North and Kaipara be subsidising if they don't really benefit? Biggest issue is we're a low-wage region. Better encouraging industry that will lift wages? What's NRC's vision - uplift general living standard in Northland? Generally in favour of Oruku as long as it makes economic sense and local hire for construction and workers Oruku is what the city needs Want Oruku to happen Oruku - get on with it. Good facilities sell themselves. We back this type of thing Oruku numbers overstated - can they be relied on? Please don't build Oruku in a flood zone. If you do it, do it well Oruku landing - support. Please build with NZ products (Kawakawa can provide these products). Consider multi-purpose sites Great example to build of recycled materials, well insulated, energy neutral - investigate alternative timber build Do we need three facilities? Look at the wider picture
Dargaville	<ul style="list-style-type: none"> [Fed Farmers] Is Whangārei airport reliable enough? Oruku would probably boost the economy, probably okay in theory. Waitangi is the best conference centre currently in Northland. Airport needs to tie in. Probably should do it
Kaitia	<ul style="list-style-type: none"> No specific comments recorded

Funding economic development

Location	Comment
Whangārei	<ul style="list-style-type: none"> Cycle track attributing to items like Kauri die-back etc. Cycleways in town rather than rural. Transfer from recreational to transport - promote cycling as transport mode
Whangārei	<ul style="list-style-type: none"> Cycleways - how practical in Whangārei, which is not flat. Currently cycling isn't safe, need to do this/work on this. Also not a cycling climate
Kerikeri	<ul style="list-style-type: none"> Disagree with joint CCE. NINC to remain owned by NRC only. Why is WDC no joining - is it because they receive benefit anyway?
Otiria	<ul style="list-style-type: none"> No specific comments recorded

05. Other comments

Other comments – increases to rates/borrowing

Location	Comment
Whangārei	<ul style="list-style-type: none"> Increase to all rates, would be happy to pay more to increase work
Whangārei	<ul style="list-style-type: none"> 20% increase a lot, though the work all looks very important. Important to be pro-active and think of the future impacts. Don't try and do everything at once, but it is important New people arriving in the region need to foot the bill for required new work. Central government and councils put up rates, but farmers income is suffering Supportive of rates rise It's a great time to borrow for investment now but need to be aware of future price tag. If you can lock it in for 12 years, then yes, borrow. Good to know that ratepayer money can be used to leverage central government funding. Support this
Kerikeri	<ul style="list-style-type: none"> Question on big increase on NRC annual Budget Live in areas where do our own water, sewerage - why do we have an increase? What are we getting (info provided) Concern about rates increases after COVID-19 - people still getting back on their feet, and all prices are going up. Could some of the increase be put on hold until people are in a better position?
Otiria	<ul style="list-style-type: none"> No specific comments recorded
Waipū	<ul style="list-style-type: none"> Support increase of \$70 pa. Very reasonable So long as we see action, great support for the proposals
Dargaville	<ul style="list-style-type: none"> [Fed Farmers] 20% rise sounds high; will depend on members (fed farmers) appetite to accept. Also noted financial situations for farmers currently much less dire than they thought it would be at this time last year [Fed Farmers] Cumulative rate rises difficult for farms to accept (30% last time, 20% this time). Is a 20% rate rise sustainable?

	<ul style="list-style-type: none"> • [Fed Farmers] Debt level going up could be a concern. Concern around COVID-19 impacts on businesses. Risk of accumulating debt if revenue drops because people can't pay
Kaitia	<ul style="list-style-type: none"> •

Other comments – process/administration/consultation

Location	Comment
Whangārei	<ul style="list-style-type: none"> • Those ratepayers that receive paperless rates invoices would need to receive LTP consult notifications too • More community pre-engagement • Representative for recreation board from regional council
Whangārei	<ul style="list-style-type: none"> • The work of NRC isn't well publicised - partly due to the fact that NRC doesn't 'upset' ratepayers. Acknowledge that this is difficult • Advertising what feedback comes from this process would be helpful/interesting. Very helpful to be able to discuss issues at this 'have your say' event
Kerikeri	<ul style="list-style-type: none"> • Good feedback on CD - content etc • Found out about LTP consultation via Facebook and rotary. Suggestion of sign in town for events
Otiria	<ul style="list-style-type: none"> • Not very happy with having to grasp both NRC ad FNDC LTP consultations
Waipū	<ul style="list-style-type: none"> • HYSEs were poorly advertised - holiday makers would be been interested. Communication strategy isn't working - didn't know. Suggest rates brochure, mail, Facebook
Dargaville	<ul style="list-style-type: none"> • No specific comments recorded
Kaitia	<ul style="list-style-type: none"> • Participation/engage - aquaculture, marine coastal plan • Lack of turn out does not equal no issues

Other comments – district council matters

Location	Comment
Whangārei (WDC)	<ul style="list-style-type: none"> • Concern about new building at forum north - Use existing facilities • One tree point erosion - anything planned? This is an area of overlap between WDC and NRC, erosion a big concern. No land left soon. Rockwall and pathway along this area would be a good idea. Protection has been successful in other areas of one tree point. Erosion also creating danger to kids (caves). Note that this is a worldwide issue • No support for indoor bowls or the elderly. Disappointed that Countdown site development wasn't used for disabled/elderly facilities
Kerikeri (FNDC)	<ul style="list-style-type: none"> • Concern re: zoning issues and impact on rates - zoning to horticultural use. While this is a district plan process, people don't know what is proposed. Messaging is not clear. Concern re increases resulting from Kiwifruit growers. Adjacent land blocks may suffer. Also need set-backs and buffer zones from residential and public spaces • Spraying concern - residential next to horticultural properties resulting in spray clouds. Process of resolving the issue has reached an impasse. Difficult to resolve without conflict, need a better solution, need better information. Zone reflect the more towards regenerative and spray free approaches

	<ul style="list-style-type: none"> • Extra charge for water - in case water tankers are needed. Why does everyone pay when they don't all use it? • How rates are quantified on developed vs undeveloped land; how do you know how much land is developed
Otiria (FNDC)	<ul style="list-style-type: none"> • If I agree to the increase can I have sewerage deducted/stopped • NOY and Kawakawa roads - issues to be addressed with district councils • Range of issues relating to FNDC services (lack) and amount of rates paying when we don't get these services
Waipū	<ul style="list-style-type: none"> • WDC need to invest more in beautifying Waipū township/ Waipū cove • Why aren't all new builds required to have water tanks – e.g. under decks, down side of houses
Dargaville	<ul style="list-style-type: none"> • No specific comments recorded
Kaitia	<ul style="list-style-type: none"> • Council role is to assist in region/district wide collaboration - creates opportunity for meaningful conversation and lead to opportunity for longer water supply options. Need to be link between Taitokerau and Government

Other comments – miscellaneous

Location	Comment
Whangārei	<ul style="list-style-type: none"> • Okara park pollution is a concern - too low to blow away air pollution. Pohe island as well. Concern of impact on bees and birds. Connection with daylight savings. Advocate for abolishing daylight savings • Oppose Auckland running Northland's water or sewerage • Internet in Northland is pathetic. Some people have limited internet options due to geography. During COVID-19, 4G was in demand making it unusable. Need fibre. This currently stops at Whangārei. Need to get fibre out to rural areas • Migration to Whangārei is primarily older people and Māori (info from WDC event) • Te Araroa Trust - promoting the Te Araroa trail. Working to promote sections of the Northland trail, looking for \$10K a year funding, for signage, maintenance and investment in the physical assets of the trail. The trust recognises the importance of including Māori, working with Ngati hine. Want to promote low carbon footprint of the trail and what it represents. Noted that 1200 people signed up to do the Northland trail in 2019, 60% international. This summer 800 signed up - mostly Kiwis
Kerikeri	<ul style="list-style-type: none"> • Three waters - no happy to be combined with Auckland
Otiria	<ul style="list-style-type: none"> • No specific comments recorded
Waipū	<ul style="list-style-type: none"> • Mangawhai fast-growing; harbour a major attraction • Councils and restoration society, DOC, Local Iwi working together • Council should have more involvement in fisheries management • Will there ever be a passenger train from Whangārei to Waipū? • Whangārei is often left "off the list"/overlooked. E.g. median house price data. Northland not well represented in media/stats • When are you doing a unitary plan? • Monitoring - support better evidence-based monitoring. • Support more targets, good information to inform decision-making • Precautionary approach in data gaps - challenging for business (NZ refining). • Better collaboration of monitoring - NZ refining and NRC.

	<ul style="list-style-type: none"> • Many touchpoints - but silo operations constantly needing to build relationships across council/DOC/TPK/district councils; could be customer-centric • More dog control - geo fencing
Dargaville	<ul style="list-style-type: none"> • No specific comments recorded
Kaitia	<ul style="list-style-type: none"> • Community led is key • Valuing social - capital

What you told us: raw feedback from our 'Have your say' events

Raw feedback: Whangārei – Tuesday 23 March

23. 03. 2021

- Main issue water & air quality, majority of \$\$\$ to. Or not right time for that sort of item for spend. Real issues with Climate Change which is where \$\$\$ should be going. Covid unknown thus possible restricted use of Conference facilities. Water quality high importance, reports from overseas regarding pollution of water. ~~Some with~~ Pesticides effect on environment (water & air quality), would be good to highlight more. Community groups given more tools to help with water & air quality. More monitoring of water & air quality. More emphasis on community being made aware of Regulation. Need to move faster, agencies passing the buck on certain environmental issues. Immediate moratorium on aerial & roadside spraying. Suburban cat & dog issues with kiwi. Pine forests not allowed within certain radius (effects on environment, rivers, air), effects of logging - noticeable activity. Basic Rules / Regs sent with Rates. Increase infringements.

© Pesticide test monitoring

These notepayers that receive paperless notes invoices
Can they receive LTP consult notifications

Councillor Maori Engagement - get info out more, use of technology to dispense info more readily. School road shows, children engagement. Enviro schools (limited resource & seems like a competition to get into. School initiated - should be Council initiated more. Community given more info to help improve their involvement. Become more a we than a you or I (us/you). More in Kohanga & Kura schools.

Shuttle service from Rural areas (Tutukaka etc), potentially local contractor, 3 times a day.

Cycle track attributing to items like Kauri Die Back etc. (Rural)

Cycle ways in town rather than rural.

Smaller bus sizes rather than the big empty buses currently.

Electric buses.

Transfer from Recreational to transport promote cycling as transport mode.

Water needs apply to large portion of the Community. Not enough rain, job loss due to Covid - affordability of solutions. Sounds like a good idea (water tank scheme), supported.

Water saving education (water foot pump for kitchen dishes), innovative saving solutions.

Climate change = always more! Emission controls on cars. Tree protection. Pine forest/logging not in certain areas. Blanket spraying (pesticides). Representative for Recreation board from Regional Council.

Increase to all rates, would be happy to pay more to increase work.

Hikurangi swamp (KMR?)

Big ups for Sporting Rec rate continuing

Flood wall Tawera, great. (Blue/Green wxc)

Why can't we help more people with Pest Plants (more community engagement)

More community pre engagement.

Maori engagement important. Marine environment with water use from sporting agencies, access to the water (fair access). Mooring of boats, hindering access to water/restricting water based recreation, too many, greatly increasing in amount a concern. Mangakahia water ways very important to locals, water quality/access, transfer of tuna manually up past power station. Waka used to help this/clean up of waterways. Health of waterways & Climate Change.

Raw feedback: Whangārei – Wednesday 24 March

Shane Notar Knowlar Interim
Northland Regional Trust – Te Araaro Kōwhiri Chair

Objectives of the NRT:

- * Promote the trail
- * Steward + promote the sections of the Northland trail – and disperse trails? = Whangārei. each year
- * requesting \$10k for signage + maintenance + investment in the physical assets of the trail
- * Recognise importance of including Māori
- * Work with Ngāhina
- * Wants to promote the low carbon footprint of the trail and what it represents

*
Pre covid:
1200 signed up in 2019 to do the Northland Trail
60% international
This summer 800 signed up. – mostly Kiwis
• Supportive of rates rise

24.03.2021 ①

- Note historical reluctance to address flood/drought issues.
- Support for flood works.
- Concern about unused buildings, so no support for building new facilities, use existing.
- WDC - Concern re new building + Forum north.
- 20% increase a lot, though the work all looks very important.
- Important to be pro-active and think of future impacts
↳ support for this (being proactive).
- New people arriving in the region need to foot the bill for required new work.
- Central govt & councils put up rates, but farmers income suffering.
- It's a great time to borrow for investment now but need to be aware of future price tag. - If you can take in for 12 years, then yes, borrow.
- Don't try and do everything at once - but it is important
- Water work - very important.
- Data collection can be a bottomless pit. Sometimes smaller solutions can be better options

24.03 ②

- Do not support Oruku investment
- Is Oruku development wise given tsunami-zones?
- Stadium should meet some of the conference centre needs.
- No support for indoor bowls or the elderly. Disappointed that Cantedown site development wasn't used for disabled/elderly facilities.
- Whangārei harbour: do not support tankers/cargo containers at the port. Do not want to look at this.
- The Whangārei harbour should be given value like a person, and decisions around this should be considered in terms of how good the decision is for the water/harbour (Te mana o te wai)
- marine pests: occasional rentals of boats with hull fouling - need to tighten rules about who you can rent to.
- Users should pay for marine biosecurity.
- Okara park pollution a concern, too low to blow away air pollution. Pohe island as well. Concern of impact on bees. Connection with daylight savings. Advocate for abolishing daylight savings.
- Buses: Concern about underutilisation of buses. Need to look at local & travel share system/shuttle. Subsidise these programmes rather than traditional bus services. People should pay something but need to look in to alternatives.
- No buses in some areas (Mauru, past Mauru). No incentive to use buses, cars very prevalent.

24.03.2021 ③

- Keep moving with technology re: buses.
- One Tree Point erosion - anything planned? This is an area of overlap between WDC + NRC, erosion a big concern. Right now.
- ↳ Rockwall and pathway along this area would be a good idea.
- Protection has been successful in other areas of one tree point.
- erosion also creating danger to kids (caves)
- Note that this is worldwide issue.
- Reclaiming land not a good idea with sea level rise. Climate change not real.
- Do not support forcing of creeks.
- Support/agree that flood works need to be done. - All far areas are important.
- Removing material from rivers proposed as solution to flooding.
- ↳ Ratepayers should not have to bear the full cost of flood schemes.
- Building new dams should introduce opportunity to sell water to horticulture.
- Dams can silt up - don't build them in clay areas.
- Pest control → don't try to tackle everything: this could be very costly. Hold back on embracing every issue. Don't want rates to skyrocket.
- Need to be reasoned and apply logic to biosecurity spend.
- Utilise landowners more for biosecurity work. Eg. encourage rabbit control, provide more possum traps. (CPCA)
- Good to know that ratepayer money can be used to leverage central government funding. Support this.
- Need to be made aware of CPCA etc & other work.

- ④ 24.03
- The work of WCC isn't well publicised - partly due to the fact that WCC doesn't 'spend' ratepayers. Acknowledge that this is difficult.
 - Advertising what feedback comes from this process would be helpful/interesting.
 - Very helpful to be able to discuss issues at this HSE.
 - Tsunami warnings not well communicated and caused big traffic congestion.
 - Unclear what tsunami alarm improvements are - if current isn't working, then should replace.
 - Phone warnings weren't consistent. Messaging wasn't consistent.
 - Acknowledge that tsunami warnings weren't local issue - national cash issue.
 - COEM building - support, but ideally would use existing building.
 - Concern around number of houses in tsunami zones. ^{why are they being built there?}
 - Risk areas ^(human) should be identified and publicised. How high are the different suburbs etc.
 - Support for COEM building - once its clear what it is, ^{possibly support} it.
 - * - Māori partnerships - concern re. rep review/and skewing that can happen by using māori electoral role.
 - What if people want to be on ~~national~~ māori role for national elections but not for local?
 - The idea of staff having cultural capacity/being able to communicate with māori and coming alongside is good. Support this.
 - Oppose Auckland running Northland water or sewage.
 - Why are buses so big when patronage is low.
 - Like to see park'n'ride beginning → manure, Porua Bay etc
 - Acknowledge that electric vehicles will be common the norm. Issues with grid supply when everyone is charging in the evening.
 - North would be vulnerable to a severance from the Auckland grid.

- ⑤ 24.03
- Concern over practicality and ongoing impacts of electric cars, and vulnerability of power supply. ^(ignoring geothermal). Will eventually all be charged ^(not fun) ^{charging}.
 - Cycleways - how practical in Whangārei, which is not flat. Currently cycling isn't safe, need to do this/work on this. Also not a cycling climate.
 - Smoke from fires makes rain/breaks drought. Fire by permit (instead of ban).
 - Firm no on onaker (as) - could turn people away by having accommodation that is too expensive. Need ^{last} ^{drudgely} ^{option}.
 - Support for onaker (x1).
 - Internet in Northland is pathetic. Some people have limited internet option due to geography. During Covid 4G was in demand making it unusable. Need fibre. This currently stops at Whangārei. Need to get fibre out to rural areas.
 - Migration to Whangārei primarily older people and māori ^(info from WDC) ^{recent}.
 - "pushy" bus drivers could be another option (alternatives to bus lanes eg, tickle hill).
 - Need to work on comms/marketing around bus usage/attitudes.

Raw feedback: Kerikeri – Thursday 25 March

- 25 MARCH 2021
1. Good feedback on CD - (content, apper) → Carbon Neutral NZ Trust - Kerikeri - 300p
 2. Supportive of zero carbon activities. - good feedback on NRC staff (Matti Boe) - Happy with draft to CCC.
 3. Support the rate increase for pest control.
 4. Disappointed on rivers' status. - high levels of E.coli after heavy rain. - "No swimming" signs for rivers that ARE swimmable - Would like to undertake further tests to detect bovine, avian or human factors (test cost = 800\$)
 5. Disagree with joint CCO. - NINC to remain owned by NRC only. - Why is WDC not joining? Is it because they receive benefits anyway?
 6. Disagree with Oruku Land use. - Prefer to see donations from WDC for Oruku & more contribution to DCs. - ~~Want to see~~ How relative is this project to today's COVID world.
 7. Regional Project Reserve not to be used for operational - CD p.46 seek clarification - possibly costs. - change the wording in CD (emergency cases) 1.

- 25 MARCH 2021
8. BIOSECURITY - land - Preferred option to "Do More". - good policy!
 9. 3 WATERS - Not happy to be combined with Auckland.
 10. Question on big increase on NRC annual budget. - Electric buses to start operating earlier?
- Operational spend
→ Reserves.
Capital spend
Criteria spend - emergency
Eg, act of God

- RK 25-03-21
- * Concern re: Zoning issues and impact on rates. Zoning to horticultural use. District Plan process → people don't know what's proposed. Messaging not clear. Concern re: rates increases resulting from kiwifruit growers → land blocks in between may suffer. → need set-backs & buffer zones from residential & public spaces (roads).
- * Spraying concern - residential next to horticultural properties resulting in spray clouds. Process of ~~comp~~ resolving the issue has hit a brick wall. Difficult to resolve without conflict, need a better solution, need better information.
- * NRC should have more power to inspect and enforce rules/conditions around spraying (equipment etc).
- * Tsunami warning → need to have clear guidance on the level of risk on a geographical scale - should be easier to find out where you are / where you sit. Information can be confusing. Availability of maps of zones. (link etc). or a rule of thumb around height above sea level.
- * If something could be in messaging eg "get above 10m"
- * A lot of concentration on waterways, but are we considering spray in terms of water quality. Support for this monitoring.
- * Concern about rates increases after Covid - people still getting back on their feet, and all prices are going up. Could some of the increase be put on hold until people are in a better position?

- RK @ 25-03
- * Five
Extra charge for water - increase water tanks are needed. Why does everyone pay when they don't use it?
- * Concerns about rate recovery and impact of those not paying on the amount of rates.
- * Five: how rates are quantified on developed versus undeveloped land; how do you know how much land is developed.
- * Zone reflect the move towards regenerative and spray-free approaches.

Rates rise

Ques Live in areas where we do our own water, sewerage. Why? 30% increase - FWD

- Why? ^{INFO GIVEN:} What are we getting for it?

- Regional component only.

see Pg 48 - Breakdown of specifics given re:
NRC rates rise.

- Description of flood schemes across TTI.

Ques: if it's a known flood area, do they pay increased rates? Differential rates for flood risk zones?

Marine Pest Control

- seems warranted? For work in here/
what can actually be done about it?

Oruku Landing

- concern rate payers across region will have to cover it.

- how can you start building without talking to ratepayers

Found out about LTP consultation via facebook
+ Rotary. Suggestions, sign in town.

Raw feedback: Otiria – Thursday 25 March

1. What is the cause? Council caused - Roads - closing off Sumner - such way - problem starts far upstream
2. Waitangi claims - what's going to happen to that land that's subject to claims
3. What's happened to the silt there was? From previous notes

- Why should we pay for a council caused process
- This is not the way Maori take - stand up talk not sit down quietly
- If it works, what if it doesn't?
- Those downstream of the spillway don't want to pay to have water diverted towards them
- Remove the silt where it used to be really deep after the water fit
- You used to get a boat all the way up to Taumarere @ low tide
- The silt is coming from upstream - fix this upstream. Silt is not the cause it's more a symptom
- The spillway put in has caused more problems than good
- The floods don't just start in Kokopu, it starts further back
- Do our voices really get heard. LISTEN TO THE people who know the land
- I am happy to pay and I am happy with the work proposed - flooding has always been here
- It might work & it might not but let's try. The council are here to help. Get behind the council and make it happen
- Let's get it done and if it doesn't work then go back to council
- If it comes onto my land then NO as they can't guarantee my ancestors safety (burial caves)
- We have a flooding issue - you don't raise the height of the bridge, you clean out the drain. Clean out the river 1st.
- Why can't we clean out the river & use the silt to create stopbanks
- Community needs to get together & make some decisions
- We need to keep working to not lose the funding & to work with those stuck in the flood

- Why can't we clear small areas of swamp to clear flooding - council have said no. Needs to be cleared to let the flood water through
- We need to do something to use the govt. money so we don't lose it
- Are there other options we can look to do - diverting water at other points
- Happy to pay the extra note if it's going to help, particularly the town and the people trapped in the flood
- Dredging of Veronica channel?
- Treat the cause not the symptom.
- Why can't we use culverts.
- Who owns the roading SH1 get them to pay also. Roads not ours!! Bridge isn't ours.
- If I agree to the increase can I have the sewage ducted/stopped?

25 MARCH 2021

1. Questions raised in regards to proposed spillways.
2. Requests to repair and clean drains.
3. Concerns raised on possible flood effects from projects NRC is proposing.
4. Expressed interest in causes of these floods.
5. Complaints about (new) spillway causing floods.
6. Good feedback from some on the \$6k
7. Interest from some to go for the proposed option.
8. Need better comms from TAUMARERE flood Committee - articles, letters to residents etc.
9. Supporting NRC's proposed scheme. Wish to stop flooding. - A small number of businesses will benefit, but still keen to get it started.
10. Concerns that some people have not understood the option/plan or map pictures & this is why they are being so reluctant to the proposed option.
11. Back in the day Borough Council used to undertake cleanage of Taumare(?) (significant natural areas need cleaning)
12. Support Maori wards.

13. Good feedback on implementing spillway plan.
14. Noy and Kawakawa roads - issues to be addressed with District Council.
15. Not very happy with having to grasp both NRC & FNDC LTP consultations.
16. Issues raised regarding CDEM. \$0k wasn't enough. Not satisfied with CD's performance during last floods.

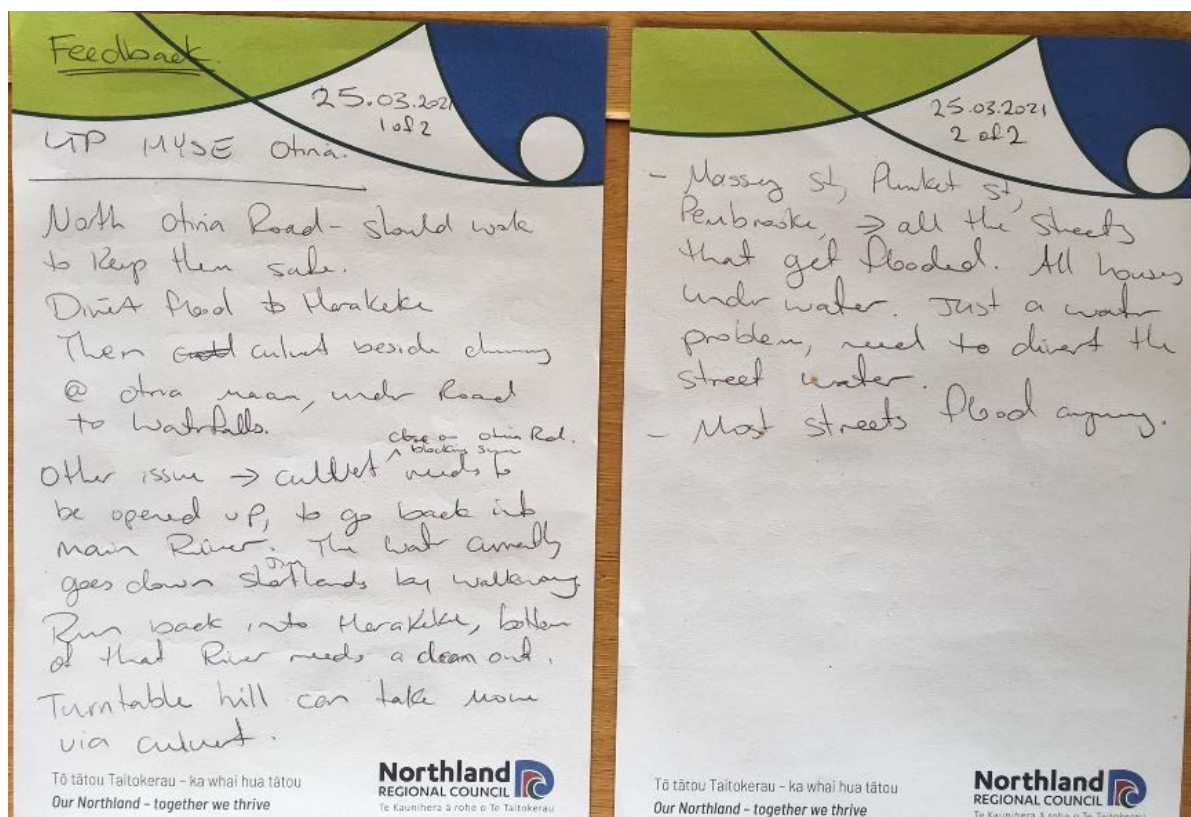

Questions (from the floor)

- Cydenway - issues from drainage / footpaths
- Taking water for Kho? - rivers are silting up.
- Maerewa / Kho / Kawakawa paying more rates than Kerikeri?
 - eg. road / railway
 - how does it contribute to flooding
- How do we address situation + drainage issues - connections to flooding?
- Presence of local hapū to support decisions / for solutions.
 - Rates? Own land in Kwa / Maerewa; pay rates twice as much
 - Mitigation? How long does it last? how long do I have to pay for it?
 - Plan
- Does it / LTP account for (what) claims?
 - Threats
- What does NRC do for Taumatāhukuku?
 - Do not agree to paying rates.
- First time have taken on board; what Murray Armstrong said; whole spillway to protect marae. So tautoko.

- Rates are differentiated, but ~~can't~~ deeper into what?
- Housing being deeply impacted by flooding.
- and for some really bad.
- What are the river flows and how will the flood works mitigate ~~and~~ improve / remedy impacts on Pokapu? behind tuia homes?
- Impact of erosion & loss of land.
- Whānau @ Taumatāhukuku, because of flood plan 'not working'?
- What about fixing drains / improvements needed.
- Last LTP plan we did not agree + \$ were re-deployed to another project/area.
- Are wāhi tapu well identified in the plan?
- Range of issues relating to FRC services (lack) and amount of rates paying when don't get these services.
- Issues re: silt into water impacts / symptom of the problem
- Problems being addressed in Opaki / Motatā
- What do the canal do for my whānau in Motatā?
- Listen to people who know better / local knowledge

- Endorse + happy to pay rates increase; seen the flooding + I'm happy to pay that
- Council here to help us / if it does work then tautoko; if it doesn't then keep them / council accountable.
- get behind council; to get it done.
- Council \$5m; what happens with the \$.
- Taumareve?

Government and agencies should have a Holistic Context like:

We want stable families living peaceful lives in prosperity and physical security while free to pursue our own spiritual or religious beliefs. Adequate nutritious food and clean water. Enjoying good education and health in balanced lives with time for family, friends and community and leisure for cultural and other pursuits. All to be ensured, for many generations to come, on a foundation of regenerating soils, ethical and humane consideration for all life and biologically diverse communities on Earth's land and in her rivers, lakes and oceans.

Then using Seven Context Checks:

1. Cause and effect. Does this action address the root cause of the problem?
2. Weak link.
 - Social: Could this action, due to prevailing attitudes or beliefs, create a weak link between us and those whose support we need?
 - Biological: Does this action address the weakest link in the life cycle of this organism?
 - Financial: Does this action strengthen the

weakest link in the chain of production?

3. Marginal reaction. Which action provides the greatest return towards the goal for each additional unit of time or money invested?
4. Gross Profit analysis. Which enterprises contribute the most to covering the overheads of the business?
5. Energy/money source and use. Is the energy or money to be used in this action derived from the most appropriate source in terms of our holistic context? Will the way in which the energy or money is used be in line with our holistic context?
6. Sustainability. If we take this action, will it lead toward or away from the future resource base described in our holistic context?
7. Gut Feel. How do we feel about this action now? Will it lead to the quality of life we desire? Will it adversely affect the lives of others?

Raw feedback: Waipū – Friday 26 March

Amy's table (Waipū) ①

* (Mangawhai Harbour Restoration Society)

- Have written submission too
- Mangawhai fast-growing; harbour major attraction
- Councils + restoration society, DOC, local iwi working together.
- Concerns:
 - Historic issues with NRC relationship; want to build collab. better
 - 2001 restoration plan; want to review with NRC & iwi. Iwi want more co-management.
 - Harbour safety & navigation
 - port & starboard lights not visible
 - channel used to move; now more permanent.
 - Entry markers need to be improved. Need to delineate channel.
 - Reef opposite Sellers (sp?) Reserve - needs to be marked.
 - NRC Harbour wardens - very little power to do anything (e.g. jet-skis); don't have boats. H&S issue. Need wardens with better powers & mobility.

Amy's table Waipū ②

(rest. society continued)

* Climate change - need guidance from NRC.

(NZ refining)

* Policy mgt, biosecurity, catchment mgt. ...

* Monitoring - support better evidence-based monitoring

- support more ~~target~~ ^{target} good info to inform decision-making. Right places.
- Precautionary approach in data gaps challenging for business
- Better collaboration of monitoring with NRC
- ~~Review~~ ^{Review} informed decision-making

* Does council have enough funding in place to develop ^(clearly defined) good policy? Esp. with RMA

* Council needs to be careful how it implements govt policy

* Need to engage early (working groups) to inform policy development (not after policy already drafted)

Amy table Waipū ③

(NZ refining)

* Regional collaboration on submissions on new govt policy (currently fragmented).

→ Does LTP have suff. resources to support better process?

* Year to collab with council on climate change subs.

NZ Ref sees itself as key player in transition.

- City is biofuel target out at 2025? We can do better within current infrastructure.
- details into NRC policy devt on climate change.
- Greening environment for renewable energy infrastructure; tensions.
- work together, early on submissions.
- NZ Ref works with central govt on this stuff anyway.
- Local solutions for national problem.

MHRs

* Tension between local solutions & setting precedent - becomes a barrier.

NZ ref

* Policy needs flexibility too. (too rigid at the moment)

(E.g. NZ ref nitrogen) ~~don't~~ ^{don't} guidelines exceedance when they ~~mean~~ ^{mean} don't produce most of the nitrogen

Amy table Waipū ④

* Policy needs to encourage right behaviour + achieve good outcomes.

* Mangawhai important breeding area - MHRs has worked hard to protect within fast-growing, highly used harbour.

* Tsunami maps good for zones; not good at telling you where to go, evacuation points. (Papakura good example) ^{of doing it well}

* General support for catchment management & downstream benefits.

* Water tank scheme - ^{only} ~~only~~ ^{only} around bang for buck (i.e. vs investment in infrastructure)

* Oruku landing - competition with stadium?

- ~~not~~ ^{not} ~~not~~ ^{not} timing in wake of Covid?
- Better assessment of benefits & risks?
- Cautious support - if it stacks up.
- Should FN & Kaipara be subsidising if they don't really benefit?
- Biggest issue is we're a low-wage region. Better & encouraging industry that will lift wages? What's NRC vision - uplift general living std in Nthld?

Amy Waipua ⑤

- * Bus electrip - have we considered biofuels?
- NZ ref big producer of hydrogen
- * Wind farm proposals, renewable energy divlpt more difficult in current regulatory environment.
- * Bus electrip - cost of transitioning with diesel fleet using biofuels - cheaper?
- * NZ Ref - support Māori partnerships work; vital for NZ Ref too.
- * MARS - ~~partnering~~ ^{MARS} to open to co-management on kōwhiri; needs to build on work that has come before.
- * Marine biosecurity: NZ Ref - need to do more. Forum horse bolted. Council needs to encourage pp to do more at early stages to avoid ~~the same~~ thing with other pests. Needs to be in place for new incursions - monitoring & action plan when found.
- * Pacific oysters - a pest, something needs to be done. Give them status as a pest. MARS happy to be actively involved in removal.

① Waipua 26/3/21 (Penny) ^{Dredging}

- Water flow / algae / Blockages / Flooding?
- Tsunami alarms yes to upgrade.
- CDEM Centre shouldn't spend as much if just a technical centre.
- Generally in favour of Oruku as long as it makes economic sense & local hire for construction & workers.
- ~~We~~ We want a "living" estuary not a dead pungent wasteland devoid of life, that is our responsibility.
- Big Yes to Moon Partnerships & increasing to work.
- Yes to water tank scheme.
- Oruku - what the city needs, ~~what~~

ENVROSCHOOLS
EDUCATION ON CLIMATE CHANGE
WATER POLICY
- HARVESTING
- DRAINAGE
- SHOULD THIS BE A FUNCTION OF COUNCIL?
WANT ORUKU TO HANDLING

* NO MORE SEA WALLS
* MORE SEAWALLS
* IMPROVING WATER RESILIENCE
ISNT IT THE LANDLORDS RESPONSIBILITY
✓ BROADER GOOD

* PULL ETS INTO INCL WETLANDS + PASTURE

BROAD SUPPORT
NATURAL ENVRO ✓
COMMUNITY RESIL ✓
REGIONAL LEAD ✓
ORUKU ✓ gets on with it good facilities
sell themselves the best this type of thing.

* ? around cost of fencing
waterways - cost
- dates
- distances
- network fencing

* GEO FENCING
* PEOPLE NOT HEARING
MATT WAIHAI SKEW.

BUSES / CONNECTIVITY (NO FEEDBACK)

REGIONAL LEADERSHIP ✓

PEST CONTROL → DO THINGS BETTER
→ BE MORE EFFICIENT
→ HIGHER OUTPUT

ORUKU LANDING (FUNDING ECO. DEV.)
#1's ORUKU (Can they be teleported?)

NETLANDS
PROTECTIONS ON NETLANDS
TO AVOID FURTHER DEGRADATION
→ REGULATION OF NETLANDS?

FARMS
ROLLOUT OF FEFS - BETTER UNDERSTANDING
OF CHANGES

② CULTURAL SAFETY + UNDERSTANDING
OF STAFF/PEOPLE

③ COUNCIL DISTURBING
MONITORING SITES
OF MANA WHENUA (CLASSIC
CAMS, CPI - economies of scale)

④ BETTER
PLANNING &
COORDINATION
OF MONITORING
EVENTS NOT
CONSTRAINED
BY COUNCIL
PROTOCOLS
e.g. council staff
shipping when
Māori will go.

MANY TOUCHPOINTS
BUT SILD OPERATIONS
CONSTANTLY NEEDING TO
BUILD RELATIONSHIPS ACROSS
COUNCIL / DOC / TPK / DISTRICT
COUNCILS

CIVIL DEFENCE
IDENTIFICATION
OF NO GO ZONES
e.g. below DMAS for
gathering sites
• Causes of sites of
safety.

MORE DOG CONTROL
signage

- Waipā 26.03 (1)
- HXSE poorly advertised - holiday makes could have been ^{intended}.
 - Communication strategy isn't working → didn't know. → Rates brochure. → mail. → Facebook.
 - Estuary + Waipā Stream.
 - Want to know what's planned. Seeking info. (agitation of siltation planned)
 - Issue is that algae gets trapped due to siltation and lack of water flow. So silted that you can now walk across estuary.
 - The "naturally" occurring bloom is getting trapped.
 - ↳ people are getting frustrated.
 - ↳ Unsafe situation (noted that health board has tested).
 - ↳ Terrible smell.
 - People are still fishing in estuary → no signs up.
 - What is the algae thriving on? What's feeding it? (lack of filter-feeding? - warning zone?)
 - Bloom has never been this intense before, seems to be getting worse.
 - How long will it take to get science/modelling & so that we can understand what's happening?
 - Is it subdivisions? Silt? more rain?
 - Cut a channel to drain the estuary!
 - ↳ People end up doing it themselves.

- Waipā 26.03 (2)
- Waipā stream is foul - don't know why.
 - Increase water flow in Waipā Estuary (this end). Sick of picking up dead fish/shellfish.
 - WDC invest more in beautifying Waipā township/Waipā canal.
 - Other end of estuary is foul as well.
 - Catchments: water flow is variable in stream. Would like consistent flow and for water to be able to be used. ^{+ water management.}
 - ~~Water~~ Biosecurity: major issue with guano moth. Need info on how to manage this. (Inshore group explained)
 - Could we stop ~~crab~~ hunting?
 - Council should have more involvement in fisheries management.
 - Shipping is a big problem in terms of biosecurity → their movements → harm moving between here island and mainland.
 - Nutrients = pollution (in relation to algae)
 - Have to do marine biosec. work → support proposal.
 - Please don't build Orukā in a flood zone. If you build it, do it well.
 - Support for tsunami siren upgrade. Current sirens easily confused with other alarms

- Waipā 23.03 (3)
- Tsunami sirens should be multi-lingual.
 - Totally support adaptive pathways planning.
 - Support water tank scheme → everyone should have water.
 - ↳ Should also offer to urban.
 - Support climate change conversation.
 - Why aren't all new builds required to have water tanks. (eg, under decks, down side of house).
 - What are the parameters for doing something about water quality after you've monitored?
 - Harbour beacons should be run by solar.
 - Support increase of \$70 p.a. very reasonable.
 - Water catchments: Roadside drains should be going in to wetlands to stop silt & rubbish. Australian example.
 - City link: what about Waipā buses?
 - Didn't even know there was a bus service to Waipā. Some people can't drive.
 - Devonport has small electric van that will take you where you want to go. App based. Could something like this work?
 - Will there ever be a passenger train from Whg to Waipā?
 - Support for council use of electric cars - this is great.

- 23.03 (4) Waipā
- Support for and against Referendum for māori seats.
 - Support māori ward decision.
 - Māori must have their voice heard. Support this.
 - Orukā landing: support. Please build with NZ products! (Kawakawa can provide these products). Consider multi-purpose sites.
 - Great example to build w/ recycled materials, well insulated, energy neutral. → Investigate timber build.
 - Do we need three facilities? Look at wider picture.
 - Whangarei is often left "off the list" / overlooked. eg median house prices.
 - Northland not well represented in media/states.
 - Note that economic development has social imperatives as well as economic.
 - When are you doing a unitary plan?
 - Transport connections with Auckland - we are vulnerable to being cut off.
 - So long as we see action, great support for the proposals

Raw feedback: Dargaville – Friday 26 March

Dargaville 26/03 Federated Farmers (Nthld) submission ①

Making sure programme well run.

- * Kaipara Moorg: Making sure trees maintained.
On around what's avail for highly erodible land.
(STARF etc).
(Mostly qns about how scheme will work, subsidies/grants etc.)
On around costs of FRP, ~~how~~ NRC staff freed up & how that cost re-allocated (classically re-allocated to increased requests under new govt pol.)
Big concern is bottom 20% who don't respond well to being regulated, not complying. Top 20% good.
- * Catchment approach - important going forward. Seem to work well.
- * Bios/biod: poss lack of coordination btwn district councils & regional? (ref to biodiversity policy, wetland mapping etc)
Need for more nuance in policy & wetland fencing...
- * 20% rise sounds high; will depend on members' (Fed Farmers) appetite to accept. Also noted financial situation for farmers currently much less dire than they thought it'd be this time last yr.
- * Cumulative rate rises difficult for farms to ~~accept~~ ^{accept} (30% last time, 20% this time...)

Dargaville 26/03 ②

- * Community resilience - flooding - who pays?
[Split btwn regional/local] [Also PAF &]
Locals should be paying more.
- * Ruapoi stop banks - need to improve what's the plan? Low-risk life, high importance to economy of Nthld; locals can't afford alone.
(Working with community, adaptation planning incl. how to fund)
Keen to bring around adaptive planning for Ruapoi?
- * Water shortages (NRC working with/supporting TTT water)
Looking at encouraging water storage.
Hope NRC encouraging water storage.
- * Water reliance scheme - had issues with supply avail.
Not sure if it sits well. How do you prioritise?
Alt water supply to take pressure off good idea.
Small communal system rather than single house?
Is it council's responsibility? [Someone needs to, which? is why we're keen to kick off]
- * Emergency management centre:
Too close to town? Out of way a bit? Kauri?
Concept of centre ok. Gains resilience with limited ph. tans, overloading.
- * Harbour safety - boat (Enb real feedback, just qns)
- * Maori partnerships - seem like big extra cost? (Maori)
(part central govt demand; part right thing to do better outcomes)
(also building capacity to enable participation)
Make sure democratic process not undermined.
Worry about what 'partnership' means.

Dargaville 26/03 ③

- * Oruker Landing: Is Whg airport reliable enough?
(WRC might be Rotorua way)
Would prob boost economy;
prob ok in theory.
Whitangi best conf centre currently in Nthld.
Airport needs to tie in.
Prob should do it.
- * Debt level going up of a concern - ?
[Debt levels low compared to others]
- * Concern around Covid impacts on businesses, businesses failing - risk of accumulating debt if revenue drops because pp can't pay. (reserves, flexibility in plans)
(this relates to rate rise and debt)
- * Lots of issues coming farmers' way - water.
Flow on effects of supply chain issues, increasing costs & unavailability of parts.
- * Main point - is \$20% rise sustainable?
(& will farmers support it?)
- * Demographics of Darg changing - transport options
(we have asked; community support insufficient)

Raw feedback: Kaitia – Saturday 27 March

KAITIA

PARTICIPATION/ENGAGE. → AQUA CULTURE
→ MARINE COASTAL PLAN

LACK OF TURNOUT ≠ NO ISSUES

① WATER SUPPLY/RESILIENCE → REMOTE AREAS (TE KAO)
→ LACKING RESILIENCE
→ RES. TO SUPPLY AREA
→ WORK WITH IWI/NOT JUST FOR COUNCIL
→ ISSUE IS RATING/METRE (UNAFFORDABILITY)
→ CURRENT QUALITY OF DRINKING WATER → TE KAO
→ STANKING OF WATER IS AN ISSUE
→ ISSUE WITH WATER TAKE BT TE AHU. (DISCHARGES UPSTREAM?)
→ WATER SHOULD BE PIPIED FROM SOURCE, NOT TAKEN FROM D/STREAM

BE GOOD TO SEE LY: ARTICULATED IN THE PLAN.

DIFFERENCE BETWEEN RESPONSIBILITY FOR BASE INFRASTRUCTURE VS SUPPORT FOR NEED FOR MORE WATER DURING DROUGHT

PRIVATISATION OF WATER

HEARD ALL THIS BEFORE → ACTIVITIES HAVE IMPACT ON ENV/RO.
→ MITIGATION METHODS LIMITED
→ COMMON SENSE NEEDS TO PREVAIL
→ NEED FOR OPEN/HONEST ACTION
→ WHOLE OF COMMUNITY

② POPULATION GROWTH/HOUSEHOLD WATER COLLECTION
③ SEDIMENT BUILDUP → WHANGA

NOT ALL HOUSES ARE COLLECTING WATER (RURAL) NEIGHBOURHOOD EXAMPLE

PRIVATE WATER COLLECTION (BYLAW)

BE APART OF PROPOSALS (JOURNEY TOGETHER)
FROM INCEPTION → THINK TANK
→ MAORI REP. GOOD START

BUSINESS RUN-OFF → WHAT IS BEING MONITORED?
(EXAMPLE: TRIBORDERS) → IS IT RELIABLE DATA?

STORM WATER FLOW/INVASIVE ORGANISMS/BIOSECURITY/DISCHARGING/WATERTHES
↓
HUGELY IMPORTANT → PRIORITY
COMPOUNDING ON AVAILABILITY OF DRINKING WATER
OVER WATER SUPPLY FOR DRINKING

PROCESS FOR ALLOCATING WATER SHOULD FOLLOW COMMON SENSE:

MAORI REP → RACIST, VOTE BASED ON BEST SUITED TO ROLE
↓
SHOULD BE → SHOULD THIS BE A PART OF THE TARGETED FEES (TO RURAL)
P33 COST OF ABANDONED BOATS → BECOME NESTING GROUNDS
SWANS + DUCKS
MAORI REP → HARBOUR SAFETY P33 → CANADIAN GEESE DETRIMENTAL TO HARBOURS
↓
- BOND COVER
- SALVAGE/SALE

COMMUNITY-LED IS KEY
VALUING SOCIAL-CAPITAL
WE WANT TO PLANT ALONG OUR WATERWAYS
ACCESS TO ECO-SOURCED PLANTS
NURSERIES → COMMUNITY/ECONOMIC/SOCIAL/ENVIRO WELLBEING.
will LEAD TO
P44 → LIVE MEETINGS INCLUDING WORKING PARTIES
MORE + MORE IMPORTANT GIVEN THE CENTRALISATION OF SERVICES/MEETING TO WHANGAREI
→ PUBLIC MEETINGS WITH STAFF VIA ONLINE

KAITIA
 Pg 45. EXAMPLE → LAND + WATER RATE COMBINED → INCREASE IS SIGNIFICANT
 → WANTS TO UNDERSTAND CALCULATION
 (TO BE TAKEN OFFLINE TO LOOK AT SPECIFIC EXAMPLE)
 OVERLAPPING WITH FNDC → WATER SUPPLY (DRINKING)
 → TE KAO, PUKENUI ...
 COUNCIL ROLE IS TO ASSIST IN REGION/DISTRICT WIDE COLLABORATION
 (TERRY ORANGE) → CREATES OPPORTUNITY FOR MEANINGFUL CONVERSATION +
 → LEAD TO OPT FOR LONGER WATER SUPPLY OPTIONS
 → NEED TO BE LINK BETWEEN TATOKRAU & GOVERNMENT
 PGF BELONGS TO ECONOMIC WELLBEING NOT NEC. COMMUNITY WELLBEING

 TSUNAMI WARNING SYSTEM → TOO RELIANT ON POWER
 → SUPPORT FOR COMMUNITIES TO HAVE SECONDARY
 ELECTRICITY BACKUP → BACKUP OPTIONS FOR RECEIVING TIMELY COMMS
 IN EMERGENCIES
 EDUCATION NEEDED ↔ PEOPLE NEED TO KNOW WHERE SAFE
 EVACUATION SITES LOCATIONS OF
 → CARE OF ELDERLY IN EMERGENCIES
