Rebecca Clarkson <rebecca.clarkson@aquaculture.org.nz>

FW: GMO fish vaccines

To: Ben Lee

Hi again Ben, we've realised that our statement will not necessarily be read as Northland specific and will need to take some time for a fuller industry discussion broader than the board which might take some time.

In the mean time we can officially say that:

*Aquaculture New Zealand supports a precautionary approach towards the use of Genetically Modified Organism vaccines in the coastal marine environment.*

Hopefully that works?

Cheers, Rebecca
