About

The sea can be a dangerous place – correct knowledge could protect you and your whānau.

This guide is not a substitute for proper education and we strongly recommend that all skippers and boat owners complete a recognised boating education course relevant to their vessel. Coastguard Boating Education offers a variety of courses, including Day Skipper, Boatmaster, and Marine VHF Radio. For more information, visit **www.boatingeducation.org.nz/courses** or phone 0800 40 80 90.

For more boating safety information, visit **www.nrc.govt.nz/onthewater**, contact Northland Regional Council's maritime team on 0800 002 004, or visit the Maritime NZ website **www.maritimenz.govt.nz/recreational**.

Distress, urgency and calls

All emergency calls – VHF channel 16 or cell phone *500.

MAYDAY: use if a vessel, aircraft or person is in grave and imminent danger and requires immediate assistance.

PAN PAN: use to indicate that a vessel has a very urgent message to transmit about its safety, such as loss of steering.

Note: when MAYDAY is not warranted but urgency is required for the safety of a vessel or person, PAN PAN should be used. Calls and messages must be cancelled if assistance is no longer required or when the incident is over.

Other ways to signal distress

- Slowly and repeatedly raise and lower your arms outstretched to each side.
- Continuously sound a fog horn or siren.
- Use a hand-held flare or parachute flare showing a red light.
- Signal SOS by any signal method, including sound, light, or mirror. The SOS signal is: three shorts, three longs, three shorts.

Use these signals only to indicate distress.
See back cover for correct radio protocol
when making a distress call.

Prep | Check | Know

Prepare your boat

- Service the engine regularly.
- Check the hull for damage.
- Ensure the bilges are clean and dry.
- Check and test batteries.
- Test steering.
- Check that electrical equipment and navigation lights work.
- Ensure the bung is in.

Check the weather forecast and your gear

Checking the weather before you head out on the water is essential to prepare for a safe trip.

MetService

Download the MetService Marine app, or visit **www.metservice.co.nz**

Maritime radio

VHF channels 67, 68, 71. Forecast times: 0533, 0733, 1033, 1333, 1733, 2133 hrs.

Live wind and wave data buoys

Whangārei Harbour:

www.northport.co.nz/weatherfeed

Bay of Islands:

www.nrc.govt.nz/waves

If in doubt, don't go out!

Equipment checklist

Life jackets – suitably sized for each person on board.

If you are on a vessel six metres and under, you must wear your life jacket when you're underway and if there is heightened risk.

Fuel – have a third to get there, a third to return and a third in reserve.

Communication devices – take two ways to call for assistance: a waterproof cellphone, VHF, EPIRB, PLB or flares.

Navigation – chart, GPS, plotter, depth sounder and navigation lights.

Anchor – suitable for vessel with chain and non-floating rope.

Bailing system – bucket, bailer or bilge pump.

Fire extinguisher – store in an appropriate case.

First aid kit – for minor accidents or injuries.

Torch – with spare batteries.

Throw line – in case of person overboard.

Alternative means of propulsion – oars or spare engine.

Make sure all passengers know what safety gear is on board, where it's stored, and how to use it.

Know the rules

The skipper is responsible for the safety of the vessel and passengers.

You must be aged over 15 to operate a vessel capable of going 10 knots or more.

Plan your safe route before departure and make sure someone on shore knows your plans.

Use your VHF radio to file a trip report with your local Coastguard or private radio station stating:

- name of vessel.
- where you are going.
- how many people are on board.
- when you expect to return.
- close your trip report once you have returned safely.

Failing to close a trip report with Maritime Radio is unlikely to spark a rescue. Telling someone where you are going and when they should call Police on 111 if you don't return is key.

Keep to the speed limit – all boats must go 5 knots (9.25 km/h) or less:

- within 50m of people in the water and other vessels or structures.
- within 200m of a boat or buoy/float flying a dive flag and within 200m of the shore.

Keep a good look out and have an additional person observing when towing.

Don't overload your vessel.

Don't drink alcohol and go boating.

To learn the 'road' rules, including how to correctly display lights and when to give way, we thoroughly recommend that all skippers and boat owners complete a recognised boating education course relevant to their vessel. Coastguard Boating Education offers a variety of courses, including Day Skipper, Boatmaster, and Marine VHF Radio. For more information, visit www.boatingeducation.org.nz/courses or phone 0800 40 80 90.

Watch your wake

Under local rules, skippers need to ensure that wake doesn't put other vessels, structures, or people at risk. Please be respectful of others and operate your craft accordingly.

Watch out for ships

Large ships need plenty of manoeuvring room and cannot stop easily. Bay of Islands and Whangārei harbours are busy and require extra vigilance.

- Don't cross the bow of manoeuvring ships.
- Within Northland harbours, all boats are required to keep well clear of and give way to ships over 500gt (gross tonnes)(and seaplanes taking off or landing).
- Cruise ships entering and leaving the Bay of Islands take the same route through the bay – be sure to keep clear of ships moving through the bay and do not anchor in the Waitangi sector light.
- Keep a look out early morning and late afternoon when cruise ships normally transit.
- Check out this year's cruise ship schedule at **www.nrc.govt.nz/maritimecalendar**

STOP exotic Caulerpa seaweed

Exotic caulerpa is a fast-growing seaweed threatening our native marine ecosystem. Boaties, fishers, and divers can help by:

- Check for seaweed on your anchor, chain, and gear.
- Remove any seaweed found and bag it securely.
- Dispose of it onshore in your rubbish or compost.
- If unsafe, return it to the water where it was found.

THINK YOU'VE SEEN IT?

What exotic caulerpa looks like

Visit www.biosecurity.govt.nz/caulerpa for the latest updates, including affected areas, controls, maps, and photos.

Areas to avoid

Channel Terminal Services prohibited area and Northport exclusion zone:

- There is a permanent prohibited area around the Channel Terminal Services (shown on chart NZ 5214).
- When the exclusion zone is in force, fluorescent 'Keep clear' signs (by day) and flashing lights (by night) are displayed on the seaward side of the ship.
- Keep clear of the shipping channel when vessels over 500gt are transiting.
- Do not anchor in the channel.

Inner Bay of Islands Zone Restrictions

Caulerpa – no anchoring or fishing (see page 13)

Marine Protection Area – no fishing – Maunganui Bay to Opoura (Oke Bay) (see pg 16 & 17)

Te Pēwhairangi (Bay of Islands) Marine Mammal Sanctuary – 5 knots at all times

For further information on Marine Mammal Safe Zones refer to DOC at www.doc.govt.nz/marinemammals

These zones correct at time of publication June 2024.

New marine protected areas

New rāhui tapu marine protected areas are in place in Northland.

These areas have been introduced to protect local marine ecosystems severely impacted by fishing.

Fishing and collecting kai moana (seafood) is no longer allowed:

- around the Mimiwhangata peninsula
- from Maunganui Bay (Deep Water Cove) to Opourua (Oke Bay) in the Bay of Islands.

In a third area, around Cape Brett, bulk harvesting of fish using commercial seining and trawling methods is prohibited to a depth of 100 metres.

Exceptions to the no-take rules include kina harvesting, research or restoration activities, and non- commercial Māori customary fishing rights guaranteed under Te Tiriti o Waitangi.

Please see the map on the opposite page.

For full navigational coordinates, please visit **www.nrc.govt.nz/marineareas** or see your Navionics app.

Steer clear of the wave buoys

All vessels are required to stay at least 100 metres clear of the wave rider buoys. Vessels in the Whangārei approaches should not enter or leave the channel between Fairway Buoy and No. 1 Buoy.

Please do not approach or fish near the buoys as they are mounted with numerous delicate instruments that can be easily damaged.

When anchoring

- Anchor carefully and ensure your boat doesn't drag or swing around and damage other craft. Check your swing room is sufficient for the anchor scope (length of anchor warp).
- Ensure you have enough anchor line out to cover the tidal range and stream. It is recommended to use at least three to five times the depth in calm conditions – additional length will be necessary in higher winds.
- Choose an anchorage clear of busy channels, marina and bay entrances, and mooring fields.
- Check your chart for prohibited anchorages and avoid areas of underwater cables.
- Visibly display your contact name and phone number/email address in case of emergency.

Crossing bars

Northland has multiple bar harbours. These have a shallow sand bar across the harbour entrance which can be dangerous to cross, particularly during low tide.

Before crossing:

- Check weather and tides for the area and seek advice from locals.
- Check your steering and engines.
- Consider the skipper's experience level and the vessel type.
- A rapid change in conditions may prevent a safe return to harbour – if your vessel and provision levels won't allow you to weather it out at sea, don't leave port.

During a bar crossing:

- Securely batten down or close all deck openings, hatches and doors.
- Ensure your vessel has adequate stability. Secure moveable objects and ensure all weights, including passengers, are as low down in the vessel as possible.
- Ensure everyone on board is awake, dressed and wearing their lifejacket.
- Approach the bar at a moderate speed so you can adjust your speed as needed.
- Have a lookout at the back of the boat to watch for dangerous building swells.

Diving and dive flags

You must fly a dive flag if you are:

- Diving from a vessel or diving unaccompanied from the shore.
- In an area where there may be passing vessels.

You must stay within 200m of a clearly displayed flag which may be:

- On a vessel – 600mm x 600mm.
- On a buoy or float attached to diver with a dive flag – 200mm x 200mm.

If you are approaching a vessel flying a dive flag slow down to below 5 knots when within 200 metres and look out for bubbles indicating a diver below.

Remember to fly your flag high so it can be seen.

Waste disposal

Rubbish barge

The rubbish barge service operates in the Bay of Islands during peak season (usually from around Boxing Day to mid-January).

During this period, dates, times and location of the barge are broadcasted by Russell Radio VHF channel 63 every day.

Sewage

There are strict rules covering sewage discharges from boats in Northland waters – these apply to every type of boat or craft.

For more information or to download our free Northland and Auckland Discharge Rules App, visit: www.nrc.govt.nz/marinepollution

Oil/fuel spills

Preventing spills

- Check the engine for leaks and clean up any fuel or oil in the bilge.
- Consider installing a bilge water filter.
- Never mix detergent with oily bilge water before pumping as most detergents are also contaminants.
- Always keep pieces of sorbent material under your engine and handy to clean up spills.
- Stop water leaking into your boat to reduce the number of times bilges need to be pumped out.

Fuelling (Bunkering) your vessel

- Estimate the amount of fuel needed before starting.
- Plug the scuppers with rags.
- Whenever possible, refuel using a fuel pump. Only use containers to transfer fuel to your boat when there is no alternative.
- Ensure your engine room bilge isn't set to automatic.

Cleaning up spills

Any oil or fuel spills from your vessel should be cleaned up with special sorbent material, which can be bought from boat chandlers and marine suppliers. Small pads soak up large amounts of oil/fuel and cannot be reused. Dispose of oily pads to landfill. Any oil/fuel should be disposed of by a specialist waste management company or at a waste oil reception facility at marinas.

Tide Tables

2024 - 2025

Tide table instructions

New Zealand daylight saving time

The tide predictions for the Standard (main) ports in this tide table have been corrected for daylight saving time. Daylight savings runs from 2am Sunday 29 September 2024 to 3am Sunday 6 April 2025.

Standard ports

All New Zealand tidal data is referenced to predictions for standard (main) ports. Northland's standard ports are Marsden Point on the east coast and Port Taranaki on the west coast.

Secondary ports

The times and heights of tides for secondary ports can be found by applying the corrections on pages 40 to 41 to the corresponding standard port predictions.

Northland's harbours

East Coast

Northland's east coast has 13 harbours:

- » Pārengarenga
- » Houhora
- » Rangaunu
- » Mangonui
- » Whangaroa
- » Bay of Islands
- » Whangamumu
- » Whangaruru
- » Whananaki
- » Tutukaka
- » Ngunguru
- » Whangārei
- » Mangawhai

West Coast

Northland's west coast has four harbours:

- » Kaipara
- » Herekino
- » Hokianga
- » Whāngāpē

Why Port Taranaki?

Tide times are calculated from standard (main) ports. The tidal information for Northland's west coast is based on the closest standard port which is Taranaki.
